If a Watercourse was Impacted, Describe Fully.* N/A

Describe Cause of Problem and Remedial Action Taken.*

The cause is mechanical failure; 3" equalizing line failed due to corrosion. Approximately 15 bbls of produced water was spilled inside lined SPCC containment. Approximately 15 bbls of water was spilled inside lined SPCC containment which allowed for 100% fluid recovery. This spill did not impact the environment.

Describe Area Affected and Cleanup Action Taken.*

The containment liner has been inspected immediately after the spill has occurred. Based on the inspection, there is no evidence that the spilled fluids have left the containment. Therefore, the environment was not impacted by this spill.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
