Can you tell me who is operator is (if BP is the operator, then working interest will have to be notified fi they are different than the proposed project area) in Section 8, 31N Range 7 West, excluding the NE/4 in the Mancos-they are the diagonal offsets who would be affected?

RE: Application for Administrative Approval for Non-Standard Location
Northeast Blanco Unit 604 Com #1H
API 30-045-35793
Surface 1872' FNL and 601' FWL Section 13-T31N-R07W
Bottom Hole 570' FNL and 50' FEL Section 18-T31N-R06W
San Juan County, New Mexico
Basin Mancos Pool Formation (97232)

Dear Sir or Madam,

BP America respectfully requests administrative approval for a non-standard location for the above referenced well. Attached for your reference are the following exhibits:

1. Administrative Application Checklist
2. Well Location Plat (C-102)
3. List of Offset Operators/Interest Owners

The subject horizontal Mancos Gas well is planned to be drilled sometime in 2017. It is anticipated that the lateral will penetrate the projected Mancos Gas horizon at 570' from the north lease line of Section 13-T31N-R07W and extend easterly maintaining the same 570' from north lease line of Section 13-T31N-R07W and Section 18-T31N-R06W(see attached C-102 for NEBU 604 Com 1H). Since the projected lateral does not meet the required 660' setback for a Mancos Gas well, BP America Production Company, as Operator of this well, must apply for an exception to this set back rule as it applies to projected lateral of the Mancos Gas horizon.

Conoco Phillips/Burlington Resources, Frank C. Davis, III, T.H. McElvain Oil & Gas LP, J&M Raymond, Ltd., Tamacam, LLC, Corinne Miller Gay Trust, and Blackwood & Rainey NEBU LLC are the offset owners for this lease line exception and have been notified by certified mail of our application. Please note that the affected parties will have 20 days to respond by mailing a protest to the above mentioned operator of the non-standard project area.

BP is also requesting administrative approval for the unorthodox location of our last take point at 250' from the east line and 570' from the north line in the subject well. BP is requesting an unorthodox location for the toe of the NEBU 604 Com 1H well to avoid stranding reserves which allows us to capture additional reserves in the wellbore. WPX is the sole offset operator for the unorthodox location of our last take point in the subject well and have been notified by certified mail.

Sincerely,

Toya Colvin-Regulatory Analyst
