If a Watercourse was Impacted, Describe Fully.\*

Describe Cause of Problem and Remedial Action Taken.\*

This leak was caused by a 3-inch steel line from the heater treater water leg to the inlet for water tanks failing. Inlet to water tank has been repaired. All fluid was contained within above ground Falcon lined containment.

Describe Area Affected and Cleanup Action Taken.\*

All fluid was recovered via vacuum truck from Falcon lined containment. Pictures have been included of cleaned containment. C141 has been marked as Initial and Final since all fluids were recovered.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
