You have requested approval of an unorthodox oil well location described above in the referenced pool or formation. This location is governed by the Special Rules for the Escrito Gallup (Associated) Pool, which provide for 80-acre units with wells to be located at least 790 feet from outer unit boundaries, and Rule 19.15.16.14.B(2) NMAC concerning directional wells in designated project areas. This surface location is outside the project area, and is permitted by Rule 19.15.16.15.B (4) NMAC which allows for surface locations outside project area. This location is unorthodox because portions of the proposed completed interval are closer to outside boundaries

Jurisdiction of this case is retained for the entry of such further orders as the Division may deem necessary.
