Administrative Order SWD-1135-A
October 26, 2017

**ADMINISTRATIVE ORDER
OF THE OIL CONSERVATION DIVISION**

Pursuant to the provisions of Division Rule 19.15.26.8(B) NMAC, Lime Rock Resources II-A, L.P. (the "operator") seeks an administrative order to utilize its Federal T SWD Well No. 1 with a location of 660 feet from the North line and 990 feet from the East line, Unit A of Section 12, Township 18 South, Range 27 East, NMPM, Eddy County, New Mexico, for produced water disposal purposes.

Currently, the Federal T SWD Well No. 1 (API 30-015-26404) is an active salt-water disposal well within the SWD; Wolfcamp-Cisco Pool (Pool code 96136).

This Order supersedes and replaces Administrative Order SWD-1135, issued on October 16, 2008, which permitted injection in a perforated interval within the Lower Wolfcamp and Cisco formations from 7,400 feet to 8,200 feet. The amended Administrative Order changes the injection interval within the Lower Wolfcamp and Cisco formations **from 6,868 to 8,060**.

THE DIVISION DIRECTOR FINDS THAT:

The application has been duly filed under the provisions of Rule 19.15.26.8(B) NMAC and satisfactory information has been provided that affected parties as defined in said rule have been notified and no objections have been received within the prescribed waiting period. The applicant has presented satisfactory evidence that all requirements prescribed in Rule 19.15.26.8 NMAC have been met and the operator is in compliance with Rule 19.15.5.9 NMAC.

IT IS THEREFORE ORDERED THAT:

The applicant, Lime rock Resources II-A, L.P. (OGRID 277558), is hereby authorized to utilize its Federal T SWD Well No. 1 with a location of 660 feet from the North line and 990 feet from the East line, Unit A of Section 12, Township 18 South, Range 27 East, NMPM, Eddy County, for disposal of oil field produced water (UIC Class II only) through a perforated interval within the Lower Wolfcamp and Cisco formations from 6,868 feet to 8,060 feet. Injection will occur through internally-coated, 3-1/2-inch or smaller tubing and a packer set within 100 feet of the permitted interval.

IT IS FURTHER ORDERED THAT:

The operator shall take all steps necessary to ensure that the disposed water enters only the approved disposal interval and is not permitted to escape to other formations or onto the surface. This includes the well construction proposed and described in the application, and as modified by the requirements of the Bureau of Land Management.

After installing tubing, the casing-tubing annulus shall be loaded with an inert fluid and equipped with a pressure gauge or an approved leak detection device in order to determine leakage in the casing, tubing, or packer. The casing shall be pressure tested from the surface to the packer setting depth to assure casing integrity.

The well shall pass an initial mechanical integrity test ("MIT") prior to resuming disposal each time the disposal packer is unseated. All MIT procedures and schedules shall follow the requirements in Division Rule 19.15.26.11(A) NMAC. The Division Director retains the right to require at any time wireline verification of completion and packer setting depths in this well.

The maximum surface injection pressure on the well shall be limited to **no more than 1374 psi**. In addition, the disposal well or system shall be equipped with a pressure limiting device in workable condition which shall, at all times, limit surface tubing pressure to the maximum allowable pressure for this well.

Any requests for an increase in tubing pressure shall only be permitted only after proper notice and hearing due to the close proximity of Class I (Non-haz wells) well. Such proper showing shall be demonstrated by sufficient evidence including but not limited to an acceptable Step-Rate Test.

The operator shall notify the supervisor of the Division's District II office of the date and time of the installation of disposal equipment and of any MIT so that the same may be inspected and witnessed. The operator shall provide written notice of the date of commencement of disposal to the Division's District office. The operator shall submit monthly reports of the disposal operations on Division Form C-115, in accordance with Division Rules 19.15.26.13 and 19.15.7.24 NMAC.

Without limitation on the duties of the operator as provided in Division Rules 19.15.29 and 19.15.30 NMAC, or otherwise, the operator shall immediately notify the Division's District II office of any failure of the tubing, casing or packer in the well, or of any leakage or release of water, oil or gas from around any produced or plugged and abandoned well in the area, and shall take such measures as may be timely and necessary to correct such failure or leakage.

The injection authority granted under this order is not transferable except upon division approval. The Division may require the operator to demonstrate mechanical integrity of any injection well that will be transferred prior to approving transfer of authority to inject.

The disposal authority granted herein shall terminate two (2) years after the effective date of this order if the operator has not commenced injection operations into the subject well. One

year after the last date of reported disposal into this well, the Division shall consider the well abandoned, and the authority to dispose will terminate *ipso facto*. The Division, upon written request mailed by the operator prior to the termination date, may grant an extension thereof for good cause.

Compliance with this order does not relieve the operator of the obligation to comply with other applicable federal, state or local laws or rules, or to exercise due care for the protection of fresh water, public health and safety and the environment.

Jurisdiction is retained by the Division for the entry of such further orders as may be necessary for the prevention of waste and/or protection of correlative rights or upon failure of the operator to conduct operations (1) to protect fresh or protectable waters or (2) consistent with the requirements in this order, whereupon the Division may, after notice and hearing, terminate the disposal authority granted herein.

DAVID R. CATANACH
Director
