If a Watercourse was Impacted, Describe Fully.\*  
N/A

Describe Cause of Problem and Remedial Action Taken.\*

The lease operator went to the site to check pumps and upon arrival found a spill inside the lined containment. Upon further inspection a hole was found in the belly line underneath the oil tank

Describe Area Affected and Cleanup Action Taken.\*

Approximately 66bbls of oil was released into the lined SPCC containment ring. A vacuum truck was dispatched and recovered approximately 66bbls of oil from lined containment. All fluid stayed inside the lined SPCC containment. Once fluids were removed the liner was visually inspected by Devon field staff for any pinholes or punctures and none were found. Based on this inspection there is no evidence that the spill fluids left containment.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.

**Subject:** Cotton Draw Unit 89 (API #30-015-31381)

Devon had the following release occur at 1:30 AM MST on 06/27/18. The incident is described below.

1. Cotton Draw Unit 89 (API #30-015-31381)
  - a. The lease operator went to the site to check pumps and upon arrival found a spill inside the lined containment. Upon further inspection a hole was found in the belly line underneath the oil tank. Approximately 66 bbls of oil was released into the lined SPCC containment ring. Approximately 66 bbls was recovered.

A C-141 will be prepared and submitted with GPS coordinates of the area affected.

Thanks,

Mike Shoemaker  
EHS Representative
