December 11, 1980

Mesa Petroleum Co.
1660 Lincoln Street, Suite 2800
Denver, Colorado 20264

Attention:

Administrative Order TX- 68

Gentlemen:

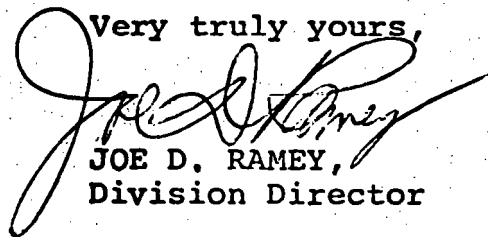

Reference is made to your request for an exception to the tubing setting requirements as contained in Division Rule 107(d)(3) for the below-named well.

Pursuant to the authority granted me by Rule 107(d)(4), you are hereby authorized to set tubing at 3,084 feet in the following well:

<u>LEASE NAME</u>	<u>WELL NO.</u>	<u>UNIT</u>	<u>S-T-R</u>
Gage Federal	3	G	20-30N-10W

The Division reserves the right to rescind this authority in the event that waste appears to be resulting therefrom.

Very truly yours,

JOE D. RAMEY,
Division Director

JDR/DSN/dr

Santa Fe, NM 87501

Attention Mr. Joe D. Ramey

Gentlemen:

Subject: Gage Federal #3
Sec. 20-T30N-R10W
San Juan County, New Mexico

Mesa Petroleum Co. requests an exception to Rule 107 for the above referenced well. The 2-1/16" tubing was set at 7,261 feet KB to produce the Dakota-Graneros interval. A retrievable production packer was set at 6944 feet which isolates the Dakota-Graneros interval from the upper Mesaverde perforations.

The 1-1/4" NUE tubing was set at 3084 feet KB to produce the Mesaverde interval. The tubing was set approximately 2 feet into the 4-1/2" liner hanger. This is 1466 feet above the upper Mesaverde perforations, but due to the I.D. of the liner, this is the lowest possible setting depth for the 1-1/4" NUE string in conjunction with the 2-1/16" IJ string.

Your consideration of this application is appreciated and if further information is necessary, please do not hesitate to contact this office.

Sincerely,

A handwritten signature in dark ink, appearing to read 'Alex Nash, Jr.'.

Alex Nash, Jr.
Division Drilling Supervisor
Rocky Mountain Division
