RE: Injection Pressure Increase  
North Vacuum Abo Unit  
Lea County, New Mexico

Dear Sir:

Reference is made to your request dated February 10, 1988, to increase the surface injection pressure on three wells within the North Vacuum Abo Unit. This request is based on step rate tests conducted on these wells on January 27 and 28, 1988. The results of the tests have been reviewed by my staff and we feel an increase in injection pressure on these wells is justified at this time.

You are therefore authorized to increase the surface injection pressure on the following wells:

<u>WELL &amp; LOCATION</u>	<u>MAXIMUM INJECTION SURFACE PRESSURE</u>
NVAU Well No. 152 Unit D, Section 13, Township 17 South, Range 34 East, NMPM;	2450 PSIG
NVAU Well No. 163 Unit J, Section 15, Township 17 South, Range 34 East, NMPM;	3670 PSIG
NVAU Well No. 170 Unit D, Section 14, Township 17 South, Range 34 East, NMPM;	3970 PSIG
All in Lea County, New Mexico	

The Division Director may rescind this injection pressure increase if it becomes apparent that the injected water is not being confined to the injection zone or is endangering any fresh water aquifers.

Sincerely,

*for* William J. LeMay  
Director
