Attention: Michael J. Newport

*RE: Injection Pressure Increase
West Lovington Unit WF Project
Lea County, New Mexico*

Dear Mr. Newport:

Reference is made to your request dated September 9, 1991, to increase the surface injection pressure on four wells within the West Lovington Unit Waterflood Project. This request is based on step rate tests conducted on certain injection wells within the unit. The results of the tests have been reviewed by my staff and we feel an increase in injection pressure on these wells is justified at this time.

You are therefore authorized to increase the surface injection pressure on the following wells.

WELL AND LOCATIONMAXIMUM INJECTION
SURFACE PRESSUREWLU No. 21
Unit I, Section 5, T-17S, R-36E, NMPM

2200 PSIG

WLU No. 32
Unit O, Section 5, T-17S, R-36E, NMPM

2200 PSIG

WLU No. 33
Unit P, Section 5, T-17S, R-36E, NMPM

2200 PSIG

WLU No. 34
Unit M, Section 4, T-17S, R-36E, NMPM

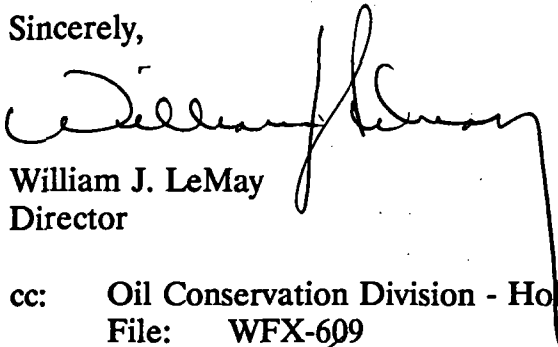

2200 PSIG

All in Lea County, New Mexico

Greenhill Petroleum Corporation

Page 2

The Division Director may rescind this injection pressure increase if it becomes apparent that the injected water is not being confined to the injection zone or is endangering any fresh water aquifers.

Sincerely,

A handwritten signature in black ink, appearing to read 'William J. LeMay', with a long, sweeping horizontal line extending to the right.

William J. LeMay
Director
