RE: *Injection Pressure Increase
Mudge "LS" Well No. 16
San Juan County, New Mexico*

Dear Sir:

Reference is made to your request dated July 10, 1991, to increase the surface injection pressure on the Mudge "LS" Well No. 16. This request is based on a step rate test conducted on the well on June 28, 1991. The results of the test have been reviewed by my staff and we feel an increase in injection pressure on the well is justified at this time.

You are therefore authorized to increase the surface injection pressure on the following well.

WELL AND LOCATION

MAXIMUM INJECTION
SURFACE PRESSURE

Mudge "LS" Well No. 16
Unit B, Section 10, T-31 North, R-11 West, NMPM
San Juan County, New Mexico

3000 PSIG

Amoco Production Company
August 15, 1991
Page 2

The Division Director may rescind this injection pressure increase if it becomes apparent that the injected water is not being confined to the injection zone or is endangering any fresh water aquifers.

Sincerely,

A handwritten signature in dark ink, appearing to read 'William J. LeMay', is written over the printed name and title. The signature is fluid and cursive, with a long horizontal stroke extending to the right.

William J. LeMay
