Describe Cause of Problem and Remedial Action Taken. (Attach Additional Sheets If Necessary)

Construction work was being done at this site. A 6" crossover connection and coupling failed during the course of a high pressure (pumping) episode and the line parted releasing fluid. The connection was reinforced and properly repaired.

Describe Area Affected and Cleanup Action Taken. (Attach Additional Sheets If Necessary)

The area affected is lease road that runs adjacent to the junction box with the failed connection. The area size is approximately 45,000 square feet. A Drawing of the affected area is attached. All fluid visible on the ground and flowing out of the pipeline was recovered. Attached is the remediation work plan, which will be appropriately adjusted for this site.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOC rules and regulations all operators are required to report and /or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOC marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, human health or the environment. In addition, NMOC acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and /or regulations.
