ADMINISTRATIVE APPLICATION CHECKLIST

THIS CHECKLIST IS MANDATORY FOR ALL ADMINISTRATIVE APPLICATIONS FOR EXCEPTIONS TO DIVISION RULES AND REGULATIONS WHICH REQUIRE PROCESSING AT THE DIVISION LEVEL IN SANTA FE

Application Acronyms:

[NSL-Non-Standard Location] [NSP-Non-Standard Proration Unit] [SD-Simultaneous Dedication]
[DHC-Downhole Commingling] [CTB-Lease Commingling] [PLC-Pool/Lease Commingling]
[PC-Pool Commingling] [OLS - Off-Lease Storage] [OLM-Off-Lease Measurement]
[WFX-Waterflood Expansion] [PMX-Pressure Maintenance Expansion]
[SWD-Salt Water Disposal] [IPI-Injection Pressure Increase]
[EOR-Qualified Enhanced Oil Recovery Certification] [PPR-Positive Production Response]

[1] **TYPE OF APPLICATION** - Check Those Which Apply for [A]

[A] Location - Spacing Unit - Simultaneous Dedication
☐ NSL ☐ NSP ☐ SD

Check One Only for [B] or [C]

[B] Commingling - Storage - Measurement
☐ DHC ☐ CTB ☐ PLC ☐ PC ☐ OLS ☐ OLM

[C] Injection - Disposal - Pressure Increase - Enhanced Oil Recovery
☐ WFX ☐ PMX ☐ SWD ☐ IPI ☐ EOR ☐ PPR

[D] Other: Specify _____

[2] **NOTIFICATION REQUIRED TO:** - Check Those Which Apply, or Does Not Apply

- [A] ☐ Working, Royalty or Overriding Royalty Interest Owners
- [B] ☐ Offset Operators, Leaseholders or Surface Owner
- [C] ☐ Application is One Which Requires Published Legal Notice
- [D] ☐ Notification and/or Concurrent Approval by BLM or SLO
 U.S. Bureau of Land Management - Commissioner of Public Lands, State Land Office
- [E] ☐ For all of the above, Proof of Notification or Publication is Attached, and/or,
- [F] ☐ Waivers are Attached

[3] **SUBMIT ACCURATE AND COMPLETE INFORMATION REQUIRED TO PROCESS THE TYPE OF APPLICATION INDICATED ABOVE.**

[4] **CERTIFICATION:** I hereby certify that the information submitted with this application for administrative approval is **accurate** and **complete** to the best of my knowledge. I also understand that **no action** will be taken on this application until the required information and notifications are submitted to the Division.

Note: Statement must be completed by an individual with managerial and/or supervisory capacity.

Submit the original application to the Santa Fe office with one copy to the appropriate District Office.

APPLICATION FOR SURFACE COMMINGLING (DIVERSE OWNERSHIP)

OPERATOR NAME: Thompson Engineering and Production Corp.

OPERATOR ADDRESS: c/o Walsh Engineering, 7415 E. Main St., Farmington, NM 87402

APPLICATION TYPE:

☐ Pool Commingling ☐ Lease Commingling ☒ Pool and Lease Commingling ☐ Off-Lease Storage and Measurement (Only if not Surface Commingled)
LEASE TYPE: ☒ Fee ☐ State ☐ FederalIs this an Amendment to existing Order? ☐ Yes ☒ No If "Yes", please include the appropriate Order No. _____

Have the Bureau of Land Management (BLM) and State Land office (SLO) been notified in writing of the proposed commingling

☒ Yes ☐ No**(A) POOL COMMINGLING**

Please attach sheets with the following information

| (1) Pool Names and Codes | Gravities / BTU of Non-Commingled Production | Calculated Gravities / BTU of Commingled Production | | Calculated Value of Commingled Production | Volumes |
|----------------------------|--|---|--|---|---------|
| Basin Dakota 71599 | | | | | |
| Basin Fruitland Coal 71629 | | | | | |
| | | | | | |
| | | | | | |
| | | | | | |

(2) Are any wells producing at top allowables? ☒ Yes ☐ No(3) Has all interest owners been notified by certified mail of the proposed commingling? ☒ Yes ☐ No.(4) Measurement type: ☒ Metering ☐ Other (Specify)(5) Will commingling decrease the value of production? ☐ Yes ☒ No If "yes", describe why commingling should be approved**(B) LEASE COMMINGLING**

Please attach sheets with the following information

(1) Pool Name and Code. Basin Dakota 71599, Basin Fruitland Coal 71629,

(2) Is all production from same source of supply? ☐ Yes ☒ No(3) Has all interest owners been notified by certified mail of the proposed commingling? ☒ Yes ☐ No(4) Measurement type: ☒ Metering ☐ Other (Specify)**(C) POOL and LEASE COMMINGLING**

Please attach sheets with the following information

(1) Complete Sections A and E.

(D) OFF-LEASE STORAGE and MEASUREMENT

Please attached sheets with the following information

(1) Is all production from same source of supply? ☐ Yes ☐ No

(2) Include proof of notice to all interest owners.

(E) ADDITIONAL INFORMATION (for all application types)

Please attach sheets with the following information

(1) A schematic diagram of facility, including legal location.

(2) A plat with lease boundaries showing all well and facility locations. Include lease numbers if Federal or State lands are involved.

(3) Lease Names, Lease and Well Numbers, and API Numbers.

I hereby certify that the information above is true and complete to the best of my knowledge and belief.

Re: Surface Commingling
Thompson Engineering
Thomas #1 and #1E (Basin Dakota)
Thomas #100 (Basin Fruitland Coal)
Section 30, T29N, R11W

Dear Mr. Fesmire,

Thompson Engineering requests permission to surface commingle the gas production from the above mentioned wells so they can utilize an existing compressor and one half mile flowline. The west half of Section 30, T29N, R11W is dedicated to all three wells but the interests are different between the two pools. This half section contains two 40 acre Federal leases (NMNM 019406 and NMNM 020982) and 235.20 acres of fee lands. This Dakota acreage has been communitized under Agreement (CA) NMNM99491. A pooling agreement has been recorded in San Juan County for the Basin Fruitland Coal formation. The Communitization agreement for the Basin Fruitland Coal is pending.

1. Proposed System: The wells are to be commingled upstream from a CPD meter so they can utilize a common compressor and flowline. The existing Enterprise meter is approximately 2500 feet from the Thomas #1 and #100. The Thomas #1E is approximately 1500 feet from the Thomas #1. Allocation meters will be installed on all wells. The gas flows into Enterprises' gathering system and they will maintain the CPD meter. The Dakota wells do produce liquid hydrocarbons but the liquids will not be commingled.

The interests in the two Dakota wells are identical and are listed in Exhibit #1. A statement from Mr. Bob Moss, Attorney At Law, to this effect is attached as Exhibit #2. The ownership of the Thomas #100 (Basin Fruitland Coal) is described in Exhibit #3 and certified by Mr. James Strickler, Certified Petroleum Landman. A statement from Mr. James Strickler, a Certified Petroleum Landman. The interest owners of all three wells have been notified of this application by certified mail Copies of these letters are attached in Exhibit #7.

The actual commercial value of the commingled production will not be less than the sum of the values of the production from each well.

2. Wells, Locations, and Lease numbers: Exhibit 5 is a topo map showing the location of the wells and the existing flowline. All three wells are on fee surface lands. The BLM has received a copy of this application. See attached letter (Exhibit #6).

3. Schematic Diagram: Exhibit #7 is a schematic diagram of the proposed facilities.

4. Fuel Gas: The compressor is the only shared facility that will burn fuel gas. The fuel gas will be allocated to each well in proportion to its share of the total production.

5. Mechanical Integrity: The flow line from the Thomas #1E to the compressor at the Thomas #1 will be a buried 2" steel line approximately 1500' feet long with a pressure rating of 7,700 psig. The pipeline will be tested to the maximum wellhead pressure of the Thomas #1E. The flow line from the Thomas #100 to the compressor at the Thomas #1 will be a buried 2" steel line approximately 150' feet long with a pressure rating of 7,700 psig. The pipeline will be tested to the maximum wellhead pressure of the Thomas #100.

6. Gravity/BTU: The BTU content of the two Dakota wells is 1264 MMBtu/MCF. The Thomas #100 is a new Fruitland Coal well that has not produced any gas yet. The well will be analyzed approximately 20 days after the first delivery. No liquid hydrocarbons will be commingled.

7. Allocation Formula: Since all three wells will have allocation meters, the production assigned to each well will be the integrated volume from the allocation meter minus its proportionate share of the compressor fuel gas.

8. Line Purging: We do not anticipate purging the line very often, but when we do the lost gas will be allocated between the three wells.

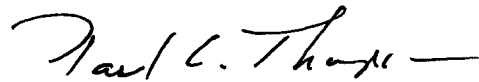

9. Purged Fluids: We do not anticipate having to purge the system, however any fluids purged will be natural gas, condensate, and produced water. Any line purging will be done to a tank.

10. Meter Calibration: The allocation and CPD meters will be calibrated once each quarter. Enterprise Field Service will maintain and calibrate the CPD meter.

11. Gas Analysis Schedule: Thompson will analyze the gas from each well twice a year. Enterprise Field Service will analyze the gas from the CPD meter twice a year.

12. Effective date: The pipeline system will be put into service as soon as approval is received.

Sincerely,

A handwritten signature in black ink, reading "Paul C. Thompson" followed by a horizontal line.

Paul C. Thompson, P.E.
President
Thompson Engineering

**RE: CERTIFICATION OF IDENTICAL OWNERSHIP
THOMAS NO. 1 AND THOMAS NO. 1-E WELL LEASE COMMINGLING**

Dear Mr. Chavez:

As an attorney licensed to practice law in the State of New Mexico, I hereby certify pursuant to Section 19.15.5.303 of the New Mexico Administrative Code that the ownership of the leases to be commingled as requested in the attached Form C-107-B application is identical in that the leases have all the same working, royalty and overriding royalty owners in exactly the same percentages.

Should you have any questions or concerns regarding the foregoing, please do not hesitate to contact me.

Sincerely yours,

Robert G. Moss

Re: Surface Commingling
Thompson Engineering
Thomas #1 and #1E (Basin Dakota)
Thomas #100 (Basin Fruitland Coal)
Section 30, T29N, R11W

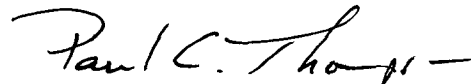

Dear Mr. Lovato,

Thompson Engineering has applied to the NMOCD to surface commingle the gas production from the three referenced wells. The west half of Section 30 is dedicated to all three wells. This acreage is a combination of fee and Federal mineral leases (NMNM019406 and NMNM 019406). The acreage has been communitized in the Dakota formation in Agreement (CA) NMNM99491. The CA for the Fruitland Coal formation is being prepared.

All three wells are located on fee mineral leases. You are being notified of this application pursuant to NMOCD rules.

Please see the attached application for a description of the proposed system.

Sincerely,

Paul C. Thompson, P.E.

Thomas #100 (Basin Fruitland Coal
Section 30, T29N R11W
San Juan County, NM

Dear Mr. Raymond Sitta, Jr.,

Thompson Engineering and Production Corp. ("TEPC") has applied to the New Mexico Oil Conservation Division for administrative approval to surface commingle the gas production from the three referenced wells.

Commingling will allow the use of a single wellsite compressor and the existing quarter mile of flowline to Enterprises' existing meter. All three wells will be measured separately through allocation meters and the compressor fuel gas will be allocated to each well in proportion to its share of the total production.

As an interest owner in one or more of these wells, you are being notified of this application pursuant to NMOCD rules. If you desire to submit remarks concerning the application, please send them to the New Mexico Oil Conservation Division, 1220 S. St. Francis Drive, Santa Fe, New Mexico, within 20 days from the receipt of this notice. If you have no objection to the proposal, no action is required on your part.

Thank you for your consideration in this matter and if you have any questions, please do not hesitate to call upon me.

Sincerely,

Paul C. Thompson, P.E.

San Juan County, NM

Dear Ms. Rebecca S. Donald,

Thompson Engineering and Production Corp. ("TEPC") has applied to the New Mexico Oil Conservation Division for administrative approval to surface commingle the gas production from the three referenced wells.

Commingling will allow the use of a single wellsite compressor and the existing quarter mile of flowline to Enterprises' existing meter. All three wells will be measured separately through allocation meters and the compressor fuel gas will be allocated to each well in proportion to its share of the total production.

As an interest owner in one or more of these wells, you are being notified of this application pursuant to NMOCD rules. If you desire to submit remarks concerning the application, please send them to the New Mexico Oil Conservation Division, 1220 S. St. Francis Drive, Santa Fe, New Mexico, within 20 days from the receipt of this notice. If you have no objection to the proposal, no action is required on your part.

Thank you for your consideration in this matter and if you have any questions, please do not hesitate to call upon me.

Sincerely,

Paul C. Thompson, P.E.

Section 30, T29N R11W
San Juan County, NM

Dear Gentlemen,

Thompson Engineering and Production Corp. ("TEPC") has applied to the New Mexico Oil Conservation Division for administrative approval to surface commingle the gas production from the three referenced wells.

Commingling will allow the use of a single wellsite compressor and the existing quarter mile of flowline to Enterprises' existing meter. All three wells will be measured separately through allocation meters and the compressor fuel gas will be allocated to each well in proportion to its share of the total production.

As an interest owner in one or more of these wells, you are being notified of this application pursuant to NMOCDD rules. If you desire to submit remarks concerning the application, please send them to the New Mexico Oil Conservation Division, 1220 S. St. Francis Drive, Santa Fe, New Mexico, within 20 days from the receipt of this notice. If you have no objection to the proposal, no action is required on your part.

Thank you for your consideration in this matter and if you have any questions, please do not hesitate to call upon me.

San Juan County, NM

Dear Gentlemen,

Thompson Engineering and Production Corp. ("TEPC") has applied to the New Mexico Oil Conservation Division for administrative approval to surface commingle the gas production from the three referenced wells.

Commingling will allow the use of a single wellsite compressor and the existing quarter mile of flowline to Enterprises' existing meter. All three wells will be measured separately through allocation meters and the compressor fuel gas will be allocated to each well in proportion to its share of the total production.

As an interest owner in one or more of these wells, you are being notified of this application pursuant to NMOCD rules. If you desire to submit remarks concerning the application, please send them to the New Mexico Oil Conservation Division, 1220 S. St. Francis Drive, Santa Fe, New Mexico, within 20 days from the receipt of this notice. If you have no objection to the proposal, no action is required on your part.

Thank you for your consideration in this matter and if you have any questions, please do not hesitate to call upon me.

Sincerely,

Paul C. Thompson, P.E.
