Exc. to Rule 3 R-565C
by Rule 4

Mr. A. L. Porter, Secretary & Director
Oil Conservation Commission
Box 871
Santa Fe, New Mexico

Dear Mr. Porter:

This is to request administrative approval of an unorthodox location to be located in the South Blanco Extension Pictured Cliffs Pool, San Juan County, New Mexico.

This well, out Schwerdtfeger No. 7-A is to be located 680' from the South line and 852' from the East line of Section 31, Township 28 North, Range 8 West, N.M.P.M., San Juan County, New Mexico. The southeastern portion of this 1/4 section consists of the edge of a mesa with the remaining portion of the 1/4 section consisting of a high mesa bench and ridges with dry washes which would make the cost of roads and location extremely expensive.

The well is to be a Pictured Cliffs test and since El Paso Natural Gas Company holds the lease in the NE/4 of Section 6, Township 27 North, Range 8 West the approval of other operators has not been sought.

I am enclosing two copies of the Certified Well Location . Plat sketching terrain conditions and two copies of our Intention to Drill.

Thank you for your attention to this matter.

Sincerely yours,

E. J. Coel
Senior Petroleum Engineer

(Field)

The elevation of the derrick floor above sea level is 6722 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

It is intended to drill a well thru the Pictured Cliff formation using rotary tools and to perforate and water fracture possible producing zones. Estimated total depth 2970'.

Casing Program:

9 5/8" at 120' with 125 sacks regular cement circulated to surface.
5 1/2" at 2970' with 75 sacks regular cement, 75 sacks Pozmix.

The 33 1/4 of Section 31 is dedicated to this well.
33 1/4 Section 31 of 079319.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
