MAIN OFFICE 000

JUL 20 - AM-10 - 05

Gentlemen:

We propose the drilling of a Mancos Formation test well in the northwest quarter of Section 2, Twp. 25N, Rge. 1W, Rio Arriba County, which is in the Canada Ojitos Unit. Because of the rugged terrain, the only practical location which can be drilled in the northwest quarter of this section is in the bottom of a narrow canyon, at the following described spot:

1280' from the north line, 1610' from the west line

This is an unorthodox location by the rules for the Puerto Chiquito Pool. Accordingly we request approval of the New Mexico Oil Conservation Commission for this unorthodox location.

For your information we are enclosing copy of topographic map of the area showing the high topographic relief in this section, also copy of survey plat and Notice of Intention to Drill.

Should you desire to inspect the location, we will of course be pleased to take one of the Commission representatives to the location.

Yours very truly,

BOLACK-GREER, INC.

Dear Mr. Porter:

Enclosed is plat of lease ownership adjoining the unorthodox location we are requesting in the Canada Ojitos Unit for our No. 9 (C-2) location. This is supplemental information to support our request for an unorthodox location for this well.

Yours very truly,
