P.O. Box 1056  
Santa Fe, New Mexico 87504

Attention: Mr. James Bruce, Attorney

Re: **Weatherly "21" Well No. 9**  
**API No. N/A**  
**1090' FNL & 1670' FEL, Unit B,**  
**Section 21, T-21 South, R-37 East, NMPM,**  
**Lea County, New Mexico**

*Administrative Order NSL-5621*

Dear Mr. Bruce:

Reference is made to the following:

(a) your application on behalf of Apache Corporation ("Apache" or "applicant") for a non-standard well location (*administrative application reference No. pCLP0712144642*) for the Weatherly "21" Well No. 9 that was submitted to the New Mexico Oil Conservation Division ("Division") in Santa Fe, New Mexico on April 30, 2007; and

(b) the Division's records pertinent to your request.

The applicant requests approval of an unorthodox oil well location for its Weatherly "21" Well No. 9 in the Penrose Skelly (Grayburg) Pool (Oil - 50350) which is to be drilled 1090 feet from the North line and 1670 feet from the East line (Unit B) of Section 21, Township 21 South, Range 37 East, NMPM, Lea County, New Mexico. The NW/4 NE/4 of Section 21 is to be dedicated to the well in the Penrose Skelly (Grayburg) Pool forming a standard 40-acre oil spacing and proration unit.

The Penrose Skelly (Grayburg) Pool is currently governed by Division Rule No. 19.15.3.104(B).

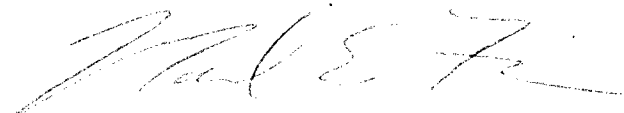

Geologic and engineering evidence submitted by the applicant demonstrates that a well at the proposed unorthodox location can recover additional reserves that may otherwise not be recovered by existing wells surrounding this location.

It is our understanding that the Weatherly Fee Lease encompasses the NW/4 and the W/2 NE/4 of Section 21, and that the ownership within this lease is common throughout. The affected offset acreage is the SW/4 NE/4 of Section 21. Since this lease is commonly owned, there are no adversely affected offset operators and/or interest owners, consequently, the applicant is not required, and did not provide notice of this application to any party.

Division records show that there is currently only one well producing from the Penrose Skelly (Grayburg) Pool within the NW/4 NE/4 of Section 21. This well is the Apache Weatherly "21" Well No. 2 (API No. 30-025-35523).

Pursuant to the authority granted under the provisions of Division Rule 19.15.3.104.F(2), the above-described unorthodox oil well location in the Penrose Skelly (Grayburg) Pool is hereby approved.

Sincerely,

A handwritten signature in dark ink, appearing to read "Mark E. Fesmire", written in a cursive style.

Mark E. Fesmire, P.E.  
Division Director
