Phyllis,

I think I messed up. I drafted a non-standard well location order as if it were a directional well. Anyway, I had it in a pile of permits for Mark's signature, and I intended to wait to issue the permit until I heard from you, but apparently, it made it's way to Mark's desk and has been signed and sent out. I'll issue you guys an amended order stating that the well is to be a conventional vertical well.

David

Dear David,

I did not get back with you sooner because I was out of the office.

I spoke with our landman and he verified that the SE/4 is a single federal lease that has common ownership. I am sorry I omitted that statement on the filing.

COG wishes to drill VERTICALLY from the non-standard location of 1156' FSL & 1650' FEL. If allowed to drill this well vertically, COG would be encroaching on our own acreage.

5/17/2007

As always, thanks for your help !!!

Hi Phyllis,

I'm a little confused on this application. Is the plan still to directionally drill the well from a surface location 1156' FSL & 1650' FEL to a standard bottomhole location 990' FSL & 1650' FEL?

Also, can you verify that the SE/4 is a single federal lease that has common ownership?

Thanks,

David Catanach
