Describe Cause of Problem and Remedial Action Taken.\*

The flowline carrying produced oil and water from the Shell State #3 well to the tank battery ruptured resulting in the release of approximately 10 barrels of produced fluid. The flowline was repaired and the leak stopped.

Describe Area Affected and Cleanup Action Taken.\*

The affected area covered 20 ft by 60 ft. The contaminated material was removed to a depth of 5" below surface and was shipped to an aerated land farm. Fresh, uncontaminated material was placed in the affected area and leveled to the contour of the land. Grass seed, native to the area, was planted.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
