Describe Cause of Problem and Remedial Action Taken. \*

A 16 inch gathering line 2 feet below the surface with 12 psig and 1 mcfd of flow and less than 100 ppm of H2S developed a 1/2 inch hole and released gas and liquids that were lying in the line. Field operators immediately blocked in line. Repairs were made to the line with a clamp and plans made to replace that section of line.

Describe Area Affected and Cleanup Action Taken.\*

Targa will replace pipe as needed. The area will be cleaned and tested per OCD guidelines.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
