Dear Mr. Ramey:

Please refer to my letter dated October 20, 1980, concerning Solar Petroleum's request for a non-standard location on their Navajo "F" #147 located 10' FNL and 2630' FWL of Section 9, T31N, R17W.

Due to this well stake being located on an existing oil pipeline, the well was moved to 80' FNL and 2580' FWL of Section 9, T31N, R17W.

A corrected C-102 and form 9-331 has been filed with the U.S.G.S, and a copy is attached to this letter for your information.

Sincerely yours,

Joe F. Elledge

Many Rocks*

This field was drilled on 40 acre spacing and water flooded with 80 acre five spot patterns. We feel this program by-passed economical recoverable oil.

The addition of these wells as proposed will produce and recover undeveloped reserves.
