RE: Application for Unorthodox Location Tenneco Roelofs #1E 660 FSL, 1240 FWL, Sec. 15, T29N, R8W San Juan County, New Mexico

Delivery Address: Englewood, Colorado NSL-1334 NSL-1334 Rule3 Rule3 Jur-81 Jukote Gres Pool Dukote Gres OIL CONSERVATION DIVISION February 25, 1981SANDA FE

Gentlemen:

Attached in duplicate (to each office) are a well location plat C-102 with a sketch of the surrounding conditions and an ownership plat for the above captioned well.

The proposed site of the Roelofs #lE is 660 FSL, 1240 FWL. This places the well only 660 feet from the south section boundary. This is the only feasible site for this well due to the severe vertical topography immediately north of the location.

A copy of this application is being submitted to all offset operators by certified mail with a request that they furnish your Santa Fe office with a waiver of objection.

Pursuant to authority of Rule 104-F we respectfully request your approval of an exemption to the standard well location requirements.

Very truly yours,

TENNECO OIL COMPANY

RE: Application for Unorthodox Location Tenneco Roelofs #1E 660 FSL, 1240 FWL, Sec. 15, T29N, R8W San Juan County, New Mexico

Gentlemen:

Attached in duplicate (to each office) are a well location plat C-102 with a sketch of the surrounding conditions and an ownership plat for the above captioned well.

The proposed site of the Roelofs #1E is 660 FSL, 1240 FWL. This places the well only 660 feet from the south section boundary. This is the only feasible site for this well due to the severe vertical topography immediately north of the location.

A copy of this application is being submitted to all offset operators by certified mail with a request that they furnish your Santa Fe office with a waiver of objection.

Pursuant to authority of Rule 104-F we respectfully request your approval of an exemption to the standard well location requirements.

Very truly yours,

TENNECO OIL COMPANY
