Re: W.A. Moncrief, Jr. #1 Baldridge Federal "Command" 2090' FSL and 1490' FEL Section 14, T24S, R24E

Beldridge Canyon Morrow Pool

Dear Mr. Ramey:

I made application on September 23, 1281 to drill the above-referenced well at an orthodox location 1657 FSL and 2005 FEL section 14. The BLM would not approve that location because of rough topography and because part of the pad fell into a Wilderness Study Area. I met with representatives of the BLM and USGS and with a dirt contractor on October 5th and they drove a stake which they would approve. I had this location surveyed and it is an unorthodox location. I wrote waiver letters to the offset operators on October 8th and forwarded the new surveyor's plats to the USGS on October 9th, 1981.

I have received waiver letters from each offset operator stating that they have no objection to this unorthodox location. Two (2) copies of each letter are attached.

Also attached are two (2) copies of the Surveyor's plat, two (2) copies of an ownership plat of the area and two (2) copies of the topog sheet of the area.

I was notified yesterday by Mr. George Stewart of the U.S.G.S. in Roswell that they have approved this location and that I can start making the road and location as soon as I receive your approval.

I would appreciate your early approval of this location. I have a rig in the area which is currently drilling at 4846' on an 11,200' contract in section 8 of T24S, R25E. I would like to get this location approved in sufficient time to make the road and location before the rig finishes the well in section 8. It will take 15 days to make the road and location.

If you need additional information, please call me at 915/682-1762 or 682-5101.

Very truly yours,

Exploration Manager

Re: W.A. Moncrief, Jr. #1 Baldridge Federal "Comm" Unit J, Section 14, T24S, R24E Eddy County, New Mexico

Dear Mr. Janssen:

W.A. Moncrief, Jr. plans to drill the #1 Baldridge Federal 1490' and 2050' FSL section 14, T24S, R24E and plans to designate the S/2 section 14 as the 320 acre proration unit.

This is an unorthodox location for the S/2 section 14; but rough topography and proximity to a Wilderness Study Area makes an orthodox location impractical.

Representatives of the USGS and BLM have been on the ground with a dirt contractor and feel that this is a more practical location than the orthodox location previously staked.

If you as an offset operator have no objection to the drilling of this unorthodox location; please so signify by signing the waiver below and return it to me.

Very truly yours,

Dewey E. Thornton Exploration Manager

EL PASO EXPLORATION COMPANY as an offset operator does not object to the drilling of the above-referenced unorthodox location.
