Dear Mr. Johnson,

11

÷.

i:

i.

e.

On 3/15/07 at 11:15 am MST, I was notified by a field operator that a leak was found on the DCP Midstream, LP operated RR Extension Line in UL N, Sec. 19, T20S, R37E. The estimated size of impact was 20' x 30' and the field operator estimated 3 bbls of heavy hydrocarbons had been released. The leak was found at 10:30 am on 3/15/07, the line was a 12" steel, low pressure pipeline, the line was depressurized and clamped in order to terminate the release. The pipe will be released as quickly as possible. If you have any questions, please let me know.

It is DCP policy to remediate to the recommended remedial action levels all releases to soils and a 3rd party contractor will be contacted to perform the delineation/remediation. At this time, the field personnel were directed to place the hydrocarbon impacted soils on plastic and backfill until arrangements could be made.

1

The attached image is a map with the lat and long of the release location.

High

Sincerely, DCP Midstream

Lynn Ward Sr. Env. Specialist

(o) 432/620-4207 (c) 432/413-3601
