Approximately 3-it. of impacted soil was excavated from the release area and disposed at a State approved disposal facility. Soil borings will be advanced to delineate the vertical extent of impacted soil. Based on laboratory analytical data from soil sample collected during the advancement of										
the soil borings, a remediation proposal will be developed and submitted to the NMOCD.										
I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may										
endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the										
operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water,										
surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
