Gentlemen:

Enclosed is the topographical map of our Empire South Deep Unit #19 location that you requested. However, topography is not the reason for the unorthodox location. As you can see from the map, a pipeline runs through the northern part of the proration unit. The pipeline forced us to move the well location to 2280' FNL and 660' FEL where it was permitted and drilled to the Morrow formation. We are now requesting approval of an unorthodox location for the Wolfcamp horizon for the same reason.

Yours very truly,

Re: Application for Non-Standard
Location: Empire South Deep
Unit No. 19, Sec. 36, T-17-S,
R-28-E, Eddy County, New Mexico

We may not process the subject application for non-standard location until the required information or plats checked below (is)(are) submitted.

☐ A plat must be submitted clearly showing the ownership of the offsetting leases.

☐ A statement must be submitted that offset owners have been notified of the application by certified mail.

☒ A plat must be submitted fully identifying the topography necessitating the non-standard location.
