B	7	15S	35E					Lea

Latitude _____ Longitude _____

NATURE OF RELEASE

Type of Release	oil	Volume of Release	43	Volume Recovered	35
Source of Release	dump valve on separator	Date and Hour of Occurrence		Date and Hour of Discovery	
Was Immediate Notice Given?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Not Required	If YES, To Whom?	7/27/07 noon	7/27/07 4 pm	
By Whom?		Date and Hour			
Was a Watercourse Reached?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse.			

If a Watercourse was Impacted, Describe Fully.*

Describe Cause of Problem and Remedial Action Taken.*

Dump valve on separator hung open allowing all produced fluids to go into the oil stock tank. The tank overflowed. A new dump valve has been installed. The contract pumper did not notify our foreman of the event until 7/30/07. We received confirmation of the amount of oil recovered this morning.

Describe Area Affected and Cleanup Action Taken.*

Area affected is approximately 30' by 60' inside the tank berm. Plans are to remove the heavily stained soil and dispose in an OCD approved facility, and backfill with clean soil.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
