See Form C-141 Attachment Item (B)

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.

Cameron Oil & Gas, Inc.
Flat C Sharp: Unit Letter H, S11-T23S-R37E, Lea County, NM

Describe Cause of Problem and Remedial Action Taken.*

- (A) At approximately 1:00 p.m. on 07-29-07 lightning struck the tank battery causing an explosion. The Eunice Fire Department was dispatched and extinguished what small fire there was still burning. The oil tank had approximately 25 bbls. of oil and it was burned up in the explosion - no oil was released. The water tank burned to 1/3 of its size and the produced water and skim of oil was released in the dirt. It was all contained in the dike. A vacuum truck recovered approximately 130 bbls. of fluid from the dike (30bbls.) and the 1/3 of tank 100 bbls.

Describe Area Affected and Cleanup action Taken.*

- (B) The oil tank blew out of dike approximately 30' to the West. The bottom blew out approximately 30' to the East on location. The water tank melted down to 1/3 and all fluid was contained in the dike. A vacuum truck received 130 bbl. of water. A backhoe will remove all the dirt in the tank berm and it will be sent to J&L Landfarm. A new tank pad lined with plastic and a new berm will be constructed. A new 300 bbl. oil tank and 300 bbl. water tank will be placed on the new pad. There was no release of liquids outside of the tank berm. There was only a small amount of oil in the oil tank, we had sold our oil before the incident.
