**Subject:** Penwell's Torreon Wash "36" State #1

I talked with Martha in your office just before lunch who called asking about the status of your application dated August 29th. On September 6th (7 days) we discussed this matter. This particular well is situated within the Arena Blanca-Entrada Oil Pool, spaced on 40 acres. Your application showed that a 160-acre unit was to be dedicated to the well. At that time you were going to provide me with a corrected application. I have a draft order that was prepared then (again in 7 days) and is ready to go out just as soon as I receive this amended request (42 days at the least). I have looked around mine, Kathy's, and David's office for this amended request thinking we somehow misplaced it. We have yet to find it but are still looking. I apologize if we have done anything to delay Penwell's application.
