Basin Dakota Pool

Gentlemen:

We hereby request a revised nonstandard location for a well to be drilled 1270 feet from the North line and 790 feet from the East line of Section 22, T29N, R11W, San Juan County, due to topographical conditions.

Any standard location in the North half of the Northeast quarter section would be located in an irrigated field or too close to residential housing and the Bloomfield High School Athletic Field.

This replaces our original April 8, 1986 application for this well location. We have moved the proposed location due to objections which had been raised by one of the off-set operators.

Copies of this application are being sent by certified mail to all offset operators of wells which are completed in the Dakota formation. The names and addresses of all these operators are shown on an attached sheet.

Also enclosed are the well location plat and an offset ownership plat.

If further information is needed, please contact us.

Yours very truly,

Ed Hartman

Gentlemen:

Enclosed is a revised application for a nonstandard location for the subject well to be located 1270' FNL and 790' FEL of Section 22, T29N-11W, San Juan County, New Mexico.

This replaces our original April 8, 1986 application for this well location. We have moved the proposed location due to objections which had been raised by one of the offset operators.

If this new location meets with your approval, please execute one copy of the waiver below and forward it to the New Mexico Oil Conservation Division.

Your early attention to this revised application would be very much appreciated since we have had an abnormal delay in getting this well started.

Yours very truly,

Ed Hartman
