Mr. Michael Cuba

It is intended to locate the D.J. Simmons Company's A.B. Geren # 1 at 475' from the South line and 1060' from the West line of Section 21-T29N-R9W, San Juan County, New Mexico. This well will be drilled and completed in the Fruitland Coal formation. The existence of Largo Canyon in the southwest corner of this section makes it impossible to build an orthodox location.

After reviewing the accompanying topographic map designating the orthodox window and the proposed well location, please sign and return this document within 20 days to Michale Stogner at the New Mexico Oil Conservation Commission in Santa Fe, New Mexico.

Should you have any questions please feel free to contact me at (505) 326-3753. I thank you in advance for your attention to this matter.

Sincerely yours,

D. J. SIMMONS CO.

Roderick Pinkett
Registered Petroleum Engineer

I hereby agree to the placement of the A.B. Geren # 1 in the aforementioned location.

Mr. Michale Stogner
New Mexico Oil Conservation Commission
P.O. Box 2088
Santa Fe, New Mexico 87501

Dear Mr. Stogner:

This is a request for administrative approval for an unorthodox gas well location in the Basin Fruitland Pool.

It is intended to locate the D.J. Simmons Company's A. B. Geren # 1 at 475' from the South line and 1060' from the West line of Section 21-T29N-R9W, San Juan County, New Mexico.

The existence of Largo Canyon in the orthodox window of Section 21 makes it impossible to build an orthodox location. This is shown on the accompanying topographical map. This location was suggested by the Bureau of Land Management.

Offsetting proration units are operated by Southern Union Exploration Co., Amoco, Meridian and Lively Exploration. All offset operators have been notified of this unorthodox location.

Plats showing the proposed well location and the terrain in Section 21, along with an ownership plat are attached.

Sincerely yours,

D.J.SIMMONS CO.

RE: A.B. Geren # 1 - Request to locate well in an unorthodox
window.

Dear Mr. Stogner;

Pursuant to our conversation on May 24,1989; I am sending
a copy of the memo sent by the BLM requesting that the A.B.
Geren # 1 be located in an unorthodox location. If you have
any questions please contact me at (505) 326-3753.

Thanks,

Dear Mr. Pinkett:

This letter is a written follow up to our conversations regarding the location of your well No. 1 A.B. Geren. After working together to find a suitable location within the window established by the New Mexico Oil Conservation Commission in the SW1/4, sec. 21, T. 29 N., R. 9 W., we suggest you submit a non-standard location. Acceptable locations and access roads cannot be developed within the window because Largo Wash covers the entire window. From our work together, a location in the SW1/4SW1/4 would be most suitable.

In the past we have discussed that non-standard locations would probably be proposed more frequently as the more desirable locations are taken by previous development and land use constraints. Hopefully, approval of these locations will become routine. We will be glad to support your non-standard proposal for this well to the NMOCC. If there is any further way in which we can be of assistance, please contact me or one of my Fluids Surface Management Staff at (505) 327-5344.

Sincerely,

for Ron Fellows
