Gentlemen:

We, on behalf of Falcon Seaboard Gas Company, hereby make application for approval of the location of the 29-4 Carson 3 #1 well to be located 989' FNL 1087' FWL of Section 3 Township 29 North, Range 4 West, Basin Fruitland Coal Gas Pool, Rio Arriba County, New Mexico.

The reason for the non-standard location is because of topography and at the request of the U.S. Forest Service to avoid further damage to the environment and wildlife habitat.

We believe that directional drilling should not be required because we may have to use a beam pump and rods to lift water from the wellbore.

We are spotting the wells as nearly "on pattern" as we can, limited by the topography, animal habitat, archaeological concentrations and tree concentrations in the forested area.

The distances between wells is within the footage parameters required by Order R-8759.

The attached exhibits show the situation at the location and surrounding area.

It is my belief that the information contained in this application is true and correct according to the information available to me.

All offset operators and lease owners are being notified by certified mail at this mailing. The Return Receipt Cards will be provided when they are returned.

If further information is needed, please contact me.

Yours very truly,

A. R. Kendrick
