Subject: GW - 195 & GW - 196

Mr. Larry Campbell,

Good morning.

As of August 28, 2007 the New Mexico Oil Conservation Division Environmental Bureau has closed two of your discharge plans, they are:

GW – 195, Texaco Bilbrey

GW – 196, Santa Fe Bilbrey

Since the facilities are no longer in operation by Transwestern Pipeline.

The inspection on August 23rd, 2007, shows a clean closed facility in each area.

If you have any questions please feel free to get with me via the information below.

Thank you and have a nice day!

llowe

Leonard Lowe

Re: Request to Cancel OCD Discharge Plan, Transwestern Pipeline Company,
Texaco Bilbrey Compressor Station **GW-195**

Dear Mr. Martin:

By this letter, Transwestern Pipeline Company is requesting cancellation of the Discharge Plan for the above referenced facility. Be advised that the engine and all chemical and oil storage tanks and containments have been removed and all that remains at the site are ancillary natural gas measurement equipment and above ground piping.

The attached photos were taken of the site to depict the existing conditions and verify that the above statements are true and accurate. Should you require additional information concerning this discharge plan cancellation request, contact the undersigned at our Roswell Technical Operations office at (505) 625-8022.

Sincerely,

A handwritten signature in cursive script that reads "Larry Campbell".
