ADMINISTRATIVE APPLICATION CHECKLIST

THIS CHECKLIST IS MANDATORY FOR ALL ADMINISTRATIVE APPLICATIONS FOR EXCEPTIONS TO DIVISION RULES AND REGULATIONS WHICH REQUIRE PROCESSING AT THE DIVISION LEVEL IN SANTA FE

Application Acronyms:

[NSL-Non-Standard Location] [NSP-Non-Standard Proration Unit] [SD-Simultaneous Dedication]
[DHC-Downhole Commingling] [CTB-Lease Commingling] [PLC-Pool/Lease Commingling]
[PC-Pool Commingling] [OLS - Off-Lease Storage] [OLM-Off-Lease Measurement]
[WFX-Waterflood Expansion] [PMX-Pressure Maintenance Expansion]
[SWD-Salt Water Disposal] [IPI-Injection Pressure Increase]
[EOR-Qualified Enhanced Oil Recovery Certification] [PPR-Positive Production Response]

[1] **TYPE OF APPLICATION** - Check Those Which Apply for [A]

- [A] Location - Spacing Unit - Simultaneous Dedication
☐ NSL ☐ NSP ☐ SD

Check One Only for [B] or [C]

- [B] Commingling - Storage - Measurement
☐ DHC ☐ CTB ☒ PLC ☐ PC ☐ OLS ☐ OLM

- [C] Injection - Disposal - Pressure Increase - Enhanced Oil Recovery
☐ WFX ☐ PMX ☐ SWD ☐ IPI ☐ EOR ☐ PPR

- [D] Other: Specify _____

[2] **NOTIFICATION REQUIRED TO:** - Check Those Which Apply, or Does Not Apply

- [A] ☒ Working, Royalty or Overriding Royalty Interest Owners
[B] ☐ Offset Operators, Leaseholders or Surface Owner
[C] ☐ Application is One Which Requires Published Legal Notice
[D] ☐ Notification and/or Concurrent Approval by BLM or SLO
U.S. Bureau of Land Management - Commissioner of Public Lands, State Land Office
[E] ☒ For all of the above, Proof of Notification or Publication is Attached, and/or,
[F] ☐ Waivers are Attached

[3] **SUBMIT ACCURATE AND COMPLETE INFORMATION REQUIRED TO PROCESS THE TYPE OF APPLICATION INDICATED ABOVE.**

[4] **CERTIFICATION:** I hereby certify that the information submitted with this application for administrative approval is accurate and complete to the best of my knowledge. I also understand that no action will be taken on this application until the required information and notifications are submitted to the Division.

Note: Statement must be completed by an individual with managerial and/or supervisory capacity.

Re: Surface Commingling
Manana Gas Co.
Cook #1, Cook #2, Royal Flush #1, Mary Jane #1,
Marian S. #1, and the Lauren Kelly #1
Sections 22 and 27, T29N, R11W

Dear Mr. Fesmire,

Manana Gas Company requests permission to surface commingle the gas production from the above mentioned wells so they can utilize a common compressor and metering station. The six wells are on various fee leases and are producing from different formations.

1. Proposed System: The wells are to be commingled upstream from a CPD meter so they can utilize a common compressor. The new Enterprise CDP meter is located in Section 22, T29N, R11W and is on the same well pad as the Cook #1 and #2, the Royal Flush #1, and the Mary Jane #1. Allocation meters are installed on four of the wells. The gas flows into Enterprises' gathering system and they will maintain the CPD meter and four of the allocation meters. No liquid hydrocarbons will be commingled.

The working and royalty interests in the six wells vary. Please refer to Exhibit #1 which lists each wells ownership. The interest owners of all six wells have been notified of this application by certified mail. Copies of these letters are attached in Exhibit #2.

The actual commercial value of the commingled production will not be less than the sum of the values of the production from each well.

2. Wells, Locations, and Lease numbers: Exhibit #3 is a topo map showing the location of the wells and the existing flow lines. All six wells are on fee surface lands.

3. Schematic Diagram: Exhibit #4 is a schematic diagram of the proposed facilities.

4. Fuel Gas: All separator fuel is used prior to the allocation meters on each well. The compressor fuel gas will be allocated to each well in proportion to its contribution to the total production.

5. Mechanical Integrity: The flow lines from each well to the CDP meter are buried 4" steel with a pressure rating of 3,330 psig. The pipeline will be tested to 500 psig.

6. Gravity/BTU: Because the wells are producing from different reservoirs, the BTU contents are not similar. Gas samples will be taken annually from each well to calculate the Btu values. The gas will be allocated on an MMBtu basis. No liquid hydrocarbons will be commingled.

7. Allocation Formula: The Cook #1 and #2 both have Enterprise operated allocation meters. The production allocated to these wells will be the volume of gas measured at the allocation meter minus its share of compressor fuel, then converted to an MMBtu basis.

The Royal Flush #1 and Mary Jane #1 share a separator and an Enterprise operated allocation meter. The Royal Flush #1 has a Manana operated allocation meter between the wellhead and the separator. The production allocated to the Royal Flush #1 will be the volume measured at the Manana operated allocation meter minus half of the separator fuel and its proportionate share of the compressor fuel, then converted to MMBtus. The production allocated to the Mary Jane #1 will be the volume measured at the Enterprise operated allocation meter minus the volume measured at the Manana operated meter on the Royal Flush #1, minus half of the separator fuel and minus its proportionate share of the compressor fuel, then converted to an MMBtu basis.

The Marian S. #1 and Lauren Kelly #1 share an Enterprise operated allocation meter. The Lauren Kelly #1 also has a Manana operated allocation meter. The production allocated to the Lauren Kelly #1 will be the volume measured at the Manana operated allocation meter minus its proportionate share of the compressor fuel, then converted to MMBtus. The production allocated to the Marian S. #1 will be the volume measured at the Enterprise operated allocation meter minus the volume measured at the Manana operated meter on the Lauren Kelly #1 and minus its proportionate share of the compressor fuel, then converted to an MMBtu basis.

8. Line Purging: We do not anticipate purging the line very often, but when we do the lost gas will be allocated between the six wells.

9. Purged Fluids: We do not anticipate having to purge the system, however any fluids purged will be natural gas, condensate, and produced water. Any line purging will be done to a tank.

10. Meter Calibration: The Enterprise operated allocation meters and the Manana operated allocation meters will be calibrated once each year if the volumes are less than 100 MCFD. The Enterprise CDP meter and any allocation meter showing a volume greater than 100 MCFD will be calibrated once per quarter. Enterprise Field Service will maintain and calibrate the CPD meter.

11. Gas Analysis Schedule: Enterprise Field Service will analyze the gas from each well and the CDP meter twice a year.

12. Effective date: The pipeline system will be put into service as soon as approval is received.

Sincerely,

A handwritten signature in black ink, reading "Paul C. Thompson" with a stylized flourish at the end.

Re: Surface Commingling Application
Manana Gas Co.
Cook #1, Cook #2, Royal Flush #1, Mary Jane #1
Marian S. #1, and Lauren Kelly #1
Sections 22 and 27, T29N, R11W
San Juan County, NM

To Whom It May Concern:

Manana Gas Company, has applied to the New Mexico Oil Conservation Division for administrative approval to surface commingle the gas production from the six referenced wells. Commingling will allow the use of a common compressor and a single Enterprise meter. As an interest owner in one or more of these wells, you are being notified of this application pursuant to NMOCD rules.

If you desire to submit remarks concerning the application, please send them to the New Mexico Oil Conservation Division, 1220 S. St. Francis Drive, Santa Fe, New Mexico, within 20 days from the receipt of this notice. If you have no objection to this proposal, no action is required on your part.

Thank you for your consideration in this matter and if you have any questions, please do not hesitate to call upon me.

Sincerely,

Paul C. Thompson, P.E.
Agent for
Manana Gas Company

October 31,

2007

Re: Surface Commingle Application
Manana Gas Co.
Cook #1, Cook #2, Royal Flush #1, Mary Jane #1
Marian S. #1, and Lauren Kelly #1
Sections 22 and 27, T29N, R11W
San Juan County, NM

To Whom It May Concern:

I have working interest in the Cook #1, Cook #2 and Mary Jane #1 wells and none in the other wells that I am aware of.

I object to Manana Gas Co. surface commingle of the above mentioned wells. How can I be sure that I am receiving fare payments or fare expenses to me with a single Enterprise meter. This is unfair to me and other interest owners of these wells.

Thank you for your prompt response.

Sincerely,

Georgie Ann Mohler
Dave N. Mohler

Subject: Surface Commingling Application on behalf of Manana Gas Co.: Cook 1, 2, Royal Flush 1, Mary Jane 1, Marian S 1, Lauren Kelly 1, San Juan County

Hello Paul:

Your application has been protested.

The OCD received one letter with both names (below) protesting this on November 2, 2007.

If you did not receive a copy and need a copy of the protest letter, please contact:

Georgie Ann Mohler and Dave N. Mohler
115 N. Mohler St
Bloomfield, NM 87413

Please attempt to negotiate with the Mohlers, or revise your proposed commingling to satisfy them and let us know what modifications you make.

The application is cancelled until you inform us otherwise - but we will save your paperwork for a period of time.

You have the immediate option to compose a Case Advertisement and have your attorney file it with Florene Davidson of this office. If you reach an accord with the Mohlers, you could dismiss the case, otherwise the case would be heard before a Division examiner.

Regards,

William V. Jones PE

Re: Surface Commingling
Manana Gas Co.
Cook #1, Cook #2, Royal Flush #1. Mary Jane #1,
Marian S. #1, and the Lauren Kelly #1
Sections 22 and 27, T29N, R11W
San Juan County, NM

Mr. Fesmire,

We have working interest in Cook #1, Cook #2, and Mary Jane #1. WE agree that it is alright to commingle the wells but we do have a few requests.

WE would like a Fisher Meter placed on the Mary Jane #1, to our knowledge they are using Kimray Meters, and they do not meet ANSI 2530 Calculation and the reason we would like a meter on it is because of the BTU content. The Royal Flush is a coal seam and has a lower BTU content.

Thank You

Sincerely,

Georgie Ann Mohler
David N. Mohler
