If a Watercourse was Impacted, Describe Fully.\*

Describe Cause of Problem and Remedial Action Taken.\*  
Leak in check valve on discharge of water transfer pump due to external corrosion. Majority of water pooled inside the facility yard. Some pooled up in road just outside the facility.  
Chlorides 53,560

Describe Area Affected and Cleanup Action Taken.\*  
Vacuum truck picked up all the water. Soil was already wet and had rain water standing in it so infiltration into the soil was minimal. Do not plan to do anything else since this is inside the facility around buildings and tanks.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
