BP America Production Company respectfully request authorization to surface commingle gas production from the Blanco Mesaverde, Otero Chacra, Basin Fruitland Coal, and Aztec Pictured Cliffs Formations. Surface commingling Blanco Mesaverde & Otero Chacra production will be from the Warren LS 5A DHC 1431 AZ, and Basin Fruitland Coal & Aztec Pictured Cliffs production will be from the Warren LS 12S DHC 1610 AZ. Both of these 'leases' are of the same base lease with the same ownership between formations. Therefore notification to working interest, royalty and overriding royalty interest owners is not required.

After separation, the production from each well will be metered prior to commingling. The commingled gas will then be sent through compression prior to entering the sales meter. (Please reference attached schematic)

The difference between what is measured prior to commingling and what is sold through the sales meter is the fuel usage. This fuel usage is allocated back to each well based on the well production.

Attached in support of our application and in compliance with NMOCD Rule 303(B) are the following documents:

1. Plats with lease boundaries showing all wells and facility locations.
2. Site Facility Schematic Flow Diagram
3. Forms C-103 & C-107-B

Should you have any questions concerning this matter please contact Toya Colvin at 281-366-7148.

Sincerely,

Toya Colvin

Hello Toya:

This sounds perfect - but our rules require a Landman or Attorney signature stating the ownership is identical over this E/2 for all those Pools.

Please corner one of your Landman's or Attorneys and get one to sign your statement and fax or mail it to my attention.

Regards,
