Subject: FW: GW-100 (Schlumberger Services - Farmington facility) Permit Renewal
Attachments: Public Notice Example for DP Renewal.doc

Jamie,

Thank you for submitting your application for the renewal of discharge permit (GW-100).

I need a couple of items before I can deem the application complete:

1) Attached is an example public notice. Please fill in the high-lighted portions as they pertain to your facility and return it to me for approval (prior to publication – I'll give you further publication details once the notice has been approved). (The OCD public notice given in 2002 indicated that the depth to groundwater at the site is ~25' and the TDS concentration is ~710 mg/L.) Also, please indicate in the notice that all liquid (at STP) tanks and drums have secondary containment.

2) Also, please submit the name of the newspaper that you propose to publish the public notice. (The *Farmington Daily Times* would be an acceptable newspaper for your public notice.)

Please submit the above information to me within 10 days.

Thank you for your cooperation in this matter. Please let me know if you have any questions regarding this matter.

Subject: Discharge permit application GW-100

Mr. Hansen,

Forgive the delay at getting back with you I was on vacation and just returned to work to find out that you called us. The application was sent to our engineer to make sure everything was correct and complete. I will send it to you just and soon as it is returned to me. Again I apologize for the delay.

Thank You

Jamie McFarland

Subject: Renewal for Discharge Permit GW-100 (for Schlumberger Well Services - Farmington)
Attachments: Renewal WQCC Notice Regs.pdf; Discharge Plan App Form.pdf; Guidelines For Discharge Plans.pdf; PN Flow Chart.20.6.2renewal.pdf

Dear Discharge Permit (GW-100) Holder:

The New Mexico Oil Conservation Division's (OCD) records indicate that your discharge permit has expired. New Mexico Water Quality Control Commission regulations (WQCC) Section 3106.F (20.6.2.3106.F NMAC) specifies that if a discharger submits a discharge permit renewal application at least 120 days before the discharge plan expires and is in compliance with the approved plan, then the existing discharge permit will not expire until the application for renewal has been approved or disapproved. You may be operating without a permit. Please submit a permit renewal application, identifying any changes and updates, with a filing fee (20.6.2.3114 NMAC) of \$100.00 by February 29, 2008. Please make all checks payable to the **Water Quality Management Fund** and addressed to the OCD Santa Fe Office. There is also a discharge permit fee, based on the type of facility, which OCD will assess after processing your application. An application form and guidance document is attached in order to assist in expediting this process.

In accordance with the public notice requirements (Subsection A of 20.6.2.3108 NMAC) of the newly revised (July 2006) WQCC regulations, "...to be deemed administratively complete, an application shall provide all of the information required by Paragraphs (1) through (5) of Subsection F of 20.6.2.3108 NMAC and shall indicate, for department approval, the proposed locations and newspaper for providing notice required by Paragraphs (1) through (4) of Subsection B or Paragraph (2) of Subsection C of 20.6.2.3108 NMAC." You are required to provide the information specified above in your permit renewal application submittal. Attached are a flow chart and the regulatory language pertaining to the new WQCC public notice requirements for your convenience. After the application is deemed administratively complete, the revised public notice requirements of 20.6.2.3108 NMAC must be satisfactory demonstrated to OCD. OCD will provide public notice pursuant to the revised WQCC notice requirements of 20.6.2.3108 NMAC to determine if there is any public interest.

Please contact me by phone 505-476-3489 or email <mailto:edwardj.hansen@state.nm.us> if you have any questions regarding this matter.

Sincerely,

Edward J. Hansen
