HAND DELIVERED

Mr. Mark Fesmire, PE, Director Oil Conservation Division 1220 South Saint Francis Drive Santa Fe, New Mexico 87505

Re: Administrative Application of RKI Exploration & Production, LLC for Approval of an Unorthodox Well Location for its
Pinnacle State Well No. 20, Unit K,
NSL Footage: 2630 FSL and 2335 FWL of Section 36 T22S, R28E, Eddy County New Mexico
Dedication of 40-acre spacing unit consisting of the NE/4SW/4 for East Herradura Bend-Delaware Pool (30670)
Dedication of 80-acre spacing unit consisting of the E/2SW/4 for the South Culebra Bluff-Bone Spring Pool (15011)

Dear Mr. Fesmire:

On behalf of RKI Exploration & Production, LLC, please find enclosed our referenced application that is being filed in accordance with Division Rule 104.D (2)(b)). This location crowds towards the SE/4NW/4 of Section 36.

Very truly yours, Thomas Kellahin

CC: RKI Exploration & Production, LLC Attn: Chip Taylor

STATE OF NEW MEXICO ENERGY, MINERALS AND NATURAL RESOURCES DEPARTMENT OIL CONSERVATION DIVISION

IN THE MATTER OF THE ADMINISTRATIVE APPLICATION OF RKI EXPLORATION & PRODUCTION, LLC FOR AN UNORTHODOX WELL LOCATION EDDY COUNTY, NEW MEXICO

ADMINISTRATIVE APPLICATION

Comes now RKI EXPLORATION & PRODUCTION, LLC ("RKI") and by and through its attorneys, Kellahin & Kellahin, and in accordance with Division General Rule 104.F, applies to the New Mexico Oil Conservation Division ("Division") for approval of an Unorthodox Well Location for its Pinnacle State Well No. 20, Unit K, Footage: 2630 FSL and 2335 FWL of Section 36 T22S, R28E, Eddy County New Mexico to be dedicated to a 40-acre spacing unit consisting of the NE/4SW/4 for East Herradura Bend-Delaware Pool (30670) and to be dedicated of 80-acre spacing unit consisting of the E/2SW/4 for the South Culebra Bluff-Bone Spring Pool (15011) in the event this well is productive from said pool or pools.

In support, RKI states:

- 1. RKI's Pinnacle State Well No. 20 is to be located in Unit K of Section 36 (see C-102 attached as Exhibit "A") and if productive:
 - a. in the Delaware formation will be located within 1-mile of the outer boundary of the East Herradura Bend-Delaware Pool and among other things, subject to a standard 40-acre spacing units. In that event, RKI would dedicate the NE/4SW/4 of Section 36 to this well. The well would encroach towards that SE/4NW/4 of Section 36 where RKI and its affiliated entities own this entire tract and thus have common interest.

- b. in the Bone Springs formation will be located within 1-mile of the outer boundary of the South Culebra Bluff- Bone Spring Pool and among other things, subject to a standard 80-acre spacing units. In that event, RKI would dedicate the E/2SW/4 of Section 36 to this well. The well would encroach towards the NW/4 of Section 36 where RKI and its affiliated entities own ALL four 40-acre tracts.
- 2. RKI desires to test the Bone Spring formation as part of this well. See locator map attached as Exhibit "B"
- 3. All of the offsetting wells were drilled to the Bone Spring formation but only produce from the Delaware formation.

TECHNICAL EVIDENCE

4. RKI's geologist and petroleum engineer have concludes that the four existing, the Pinnacle Wells 3, 4, 5 and 6 will drain approximately 20-acres thus leaving an area of the reservoir between these wells that would not otherwise be recovered at a standard location or in the wells currently production in the subject unit and the 3 offsetting units therefore justifying this additional well. See Drainage plat attached as Exhibit "C" and typical volumetric calculation for similar wells being the 3, 5, 12, and 13 as shown attached as Exhibit "D"

NOTIFICATION AND OWNERSHIP

- All of the NW/4 of Section 36 is part of the same State of New Mexico Oil and Gas Lease V-3491-1 with RKI and its affiliated entities owning 100%
- 6. The NW/4 does not currently contain any Bone Spring wells.
- 7. In accordance with Division rules, because of common ownership, no notice is required.

CONCLUSION

8. Approval of this application will afford the owners and the applicant the opportunity to produce their just and equitable share of the hydrocarbons in the Delaware and Bone Spring formation, will promote the orderly development in this area, will prevent the economic loss caused by the drilling of unnecessary wells, avoid the augmentation of risk arising from the drilling of an excessive number of wells and will otherwise prevent waste and protect correlative rights.

WHEREFORE, Applicant requests that this application be approve by the Division.

pectfully Submitted: Thomas Kellahin

Lease	нЦ	Porosity	Sw	Drainage (ACRES)	Bo (RB/STB)	R.F. (%)	VOLUMETRIC EUR (MBO)	HIST. CUM. (MBO)	RATE/TIME EUR MBO
Pinnacle 3	117	0.15	0.62	20	1.128	13	120,980	37,504	52,725
Pinnacle 5	65	0.19	0.57	20	1.128	13	94,962	94,119	152,627
Pinnacle 12	56	0.18	09.0	20	1.128	13	72,100	62,379	75,630
Pinnacle 13	୧୧	0.18	0.63	20	1.128	13	78,222	16,137	39,159
TOTAL							366,264	210,139	320,141

The Pinnacle 3, 5, 12 and 13 have volumetric reserves of 366 MBO based on 20 acre spacing. The historical cumulative oil production for the same wells is 210 MBO. From Rate/Time analysis, the four wells four wells will produce another 110 MBO over a time frame of approximately 40 years. The four wells calculate a total EUR of 320 MBO from Rate/Time analysis showing a drainage area between 15 and 20 acres. The additional well will attempt to drain the remaining 20 acres.

Subject: RKI - Pinnacle State #20 - NSL Application

Dear Tom

You state that this location encroaches towards the NW/4 of 36, which RKI and its affiliates own.

But it seems to me that it also encroaches towards the NW/SE and the SW/NE. This may not be true as to the E Herradura Bend Delaware. There the set-back is 330 from the unit line. The call for 2335 from the West line would be 305 from the easterly unit line if the Section were regular. It is obvious from the surveyor's diagram that the section is not regular, but the actual east to west dimensions are not shown. So, I cannot tell if there is an encroachment.

It seems certain, however, that there is an encroachment towards both the SE/4 and the NE/4 in the S Culebra Bluff Bone Spring. Special Pool Rules there require that the location be within 150 of the center of the quarterquarter.

Please advise concerning ownership of the affected units in the E/2 of 36, and furnish proof of notice if necessary.

Sincerely

David

Brooks, David K., EMNRD

From:Brooks, David K., EMNRDSent:Tuesday, January 29, 2008 9:39 AMTo:'Tom Kellahin'Subject:RKI - Pinnacle State #18 and #20

Dear Tom:

I see I should have looked at the applications for the #18 and #20 together. However, that still does not resolve all my questions.

The recitation in the application regarding the #18 regarding the ownership of the SE/4 of Section 36-22S-28E satisfies my concerns about encroachment of the #20 towards the SE/4. I agree that there is no need to notice Chevron of either application by reason of their ownership of the SE/SE.

My remaining concerns are as follows:

Regarding the #20: In addition to the encroachment toward the NW/SE, it encroaches toward the SW/NE, which, of course, is the drillsite tract for the #18. The fact that that is the drillsite tract, however, does not establish that RKI owns 100% of the working interest in the SW/NE, and I find no recitation to that effect in either application.

Regarding the #18: If the #18 is dedicated to a W/2 unit in the S Culebra Bluff Bone Spring, due to the Special Pool Rule, it seems to encroach toward the SE/NE, and I have not found a recitation of ownership as to that tract.

Once again, please address these issues by way of response.

Thanks

David

Subject: FW: Pinnacle wells

Hi David

The following is confirmation from RKO that it owns 100% of the WIO in the N/2 of Section 36 including the tracts you were concerned about for notice.

Please let me know if you need anything else.

Regards, Tom

From: Chip Taylor [mailto:ctaylor@rkixp.com] Sent: Tuesday, January 29, 2008 11:55 AM To: Tom Kellahin Cc: Matt Huhnke; Pat McCollom Subject: RE: Pinnacle wells

Tom,

RKI/Lobos owns 100% of the working interest in the entire section 36 from the surface to base of Bone Spring, less and except the se/se of the section.

Thanks,

Chip

From: Tom Kellahin [mailto:tkellahin@comcast.net] Sent: Tuesday, January 29, 2008 12:19 PM To: Chip Taylor Subject: Pinnacle wells

Chip,

David Brooks of the OCD is processing RKI's application this morning and has asked me some ownership questions about the SW/4NE/4 and also the SE/4NE/4 of Sec 36 22S-28E.

What is the ownership? If RKI does not have 100% of the WIO then I will be asked to send notice to the WIO.

Tom
