If a Watercourse was Impacted, Describe Fully.*					

Describe Cause of Problem and Remedial Action Taken.*

Salt water tank overflowed. Battery operated by Platinum Exploration, Inc. at time of incident. Saber Resources LLC has recently acquired ownership of the lease. Soil was excavated until confirmation samples reported chloride concentrations less than 250 mg/kg and TPH concentrations less than 100 mg/kg.

Describe Area Affected and Cleanup Action Taken.*

An area approximately 198' x 204' north, east and south of the battery, and an area approximately 37' x 60' west of the battery was excavated until confirmation soil samples reported chloride concentrations less than 250 mg/kg and TPH concentrations less than 100 mg/kg. Impacted soil was removed from the site and disposed at an NMOCD approved disposal facility. Verbal approval to backfill the excavations was granted by the OCD on 12/11/07. The excavation was backfilled with clean soil to a depth of approximately 3' bgs and covered with a layer of 20 mil plastic. The remainder of the excavation was then backfilled with clean soil to surface. Depth to groundwater is at approximately 22' bgs.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
