State of New Mexico Energy Minerals and Natural Resources

Oil Conservation Division 1220 South St. Francis Dr. Santa Fe, NM 87505

Submit 2 Copies to appropriate District Office in accordance

Form C-141

Revised October 10, 2003

with Rule 116 on back side of form

Release Notification and Corrective Action OPERATOR X Initial Report Final Report Name of Company: Energen Resources, Inc. Contact: Ed Hasely Address: 2010 Afton Place, Farmington, NM 87401 **Telephone No: 505-324-4131** Facility Name: Northwest #4E Facility Type: Oil/Gas Well Site Surface Owner: Jicarilla Apache Tribe Mineral Owner: Jicarilla Apache Tribe Lease No. Jicarilla Apache 119 LOCATION OF RELEASE Unit Letter Section Township Range Feet from the North/South Line Feet from the East/West Line County 1520 South Rio Arriba East Latitude 36.498450 Longitude -107.267900 NATURE OF RELEASE Type of Release: Oil Spill Volume of Release: 121 bbls Volume Recovered: 80 bbls Source of Release: Oil Storage Tank Date and Hour of Occurrence: Date and Hour of Discovery: 12/14/07 8:00 am 2/15/2008 If YES, To Whom? Jicarilla EPO – Dixon Sandoval, NMOCD – Brandon Was Immediate Notice Given? Powell, BLM - Mark Kelly, Bryce Hammond - Jicarilla Oil and Gas Date and Hour: 2/15/2008, 1:30 pm By Whom? Ed Hasely If YES, Volume Impacting the Watercourse. NA Was a Watercourse Reached? ☐ Yes ⊠ No **RCVD FEB 20 '08** If a Watercourse was Impacted, Describe Fully.* NA OIL CONS. DIV. Describe Cause of Problem and Remedial Action Taken.* The drain valve froze on the oil storage tank allowing the oil to leak out into the open top pit tank. The pit tank overflowed into the area around the pit tank. A vacuum truck was used to recover the free standing liquids. All fluids were contained inside the bermed area. The drain valve was replaced. Describe Area Affected and Cleanup Action Taken.* The roads and location are currently very muddy, but once the area dries, plans are to move the pit tank so that the soil beneath the equipment can be removed if necessary. Impacted soils will be excavated and transported to a commercial disposal facility. Once the soil is removed, samples will be collected from the excavation and sent to a laboratory for analysis. Upon verification that the samples are below the 100 ppm TPH, the excavation will be backfilled with soil that has been approved by Jicarilla Tribal personnel. I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
