Re: Newberry B #1N
Unit D 860' FNL & 315' FWL, Section 35, T32N, R12W,
San Juan Co., NM API - 30-045-34571

Dear Sir:

This is a request for administrative approval for a non-standard gas well location in the Basin Dakota and Blanco Mesaverde pools.

The proposed Newberry B #1N was staked as a commingle Dakota /Mesaverde well. The placement of the well is non-standard for the Dakota as per Order 10987-B (2) and the Mesaverde per Order R-109887-A (1) since neither are in a Federal Unit or Participating Area (PA). The well was staked at an unorthodox location due to terrain, archaeology, existing utilities. A majority of the area within the legal spacing window for the Mesaverde and Dakota formation is encompassed by steep and rugged terrain. The areas that would allow a suitable well location contain either underground utilities or archeology. Consequently this location was staked non-standard for the Mesaverde and Dakota formations in order to best fit the existing archeology, utilities and topography. See the attached topo and aerial map for further clarification.

Production from the Basin Dakota and the Blanco Mesaverde is included in the W/2 (320 acres) gas spacing unit of Section 35, T32N, R12W. To comply with the New Mexico Oil Conservation Division rules, we are submitting the following for your approval of this non-standard location:

1. Approved APD cover page and C102 plat showing location of the well
2. 9 Section Plat showing wells in the area
3. Offset Operator Plat for Section 35, T32N, R12W is the east half of Section 34, T32N, R12W
4. Topo and aerial maps showing the location of the well

ConocoPhillips is the offset operator of the affected section 34, T32N, R12W and has 100% ownership of the offset wells, therefore no notification is needed. Please let me know if you have any questions about this application by calling me at 505-326-9518.

Sincerely,

Patsy Clugston
