Administrative Application for Non-Standard Proration Unit, and Simultaneous Dedication for Lewis B. Burleson, Inc.'s Lynn B-25 #5 well, located 1980' FSL & 560' FWL of Section 25, T-23-S, R-36-E, Lea County, New Mexico

Dear Mr. Lemay:

Lewis B. Burleson, Inc. requests administrative approval of a non-standard proration unit, and simultaneous dedication for its Lynn B-25 #5 well which is proposed to be completed in the Jalmat Gas Pool. We have notified by Certified Letter, all offset operators as shown in Exhibit "B" so that they may object to these variances within the specified waiting period.

Non-Standard Unit and Simultaneous Dedication:

A 320 acre Non-Standard Gas Proration Unit (S/2, Sect. 25, T-23-S, R-36-E) was previously approved for the Lynn B-25 #2 and #3 by Order R-2088 and amended by Order R-8170. We plan to re-complete the #5 well located 1980' FSL and 560' FWL, in Section 25 as a Jalmat Gas well, and simultaneously dedicate all three wells to the 320 acre unit. The Lynn B-25 #5 was drilled and completed by Flag-Redfern Oil Company in 1979 as a Langlie-Mattix producer. Upon approval, we plan to plug this well back to the Jalmat Gas Pool. The Upper Yates cannot be completed in the Lynn B-25#2 due to a slim-hole completion through a liner. This is why we wish to complete the Lynn B-25 #5 in the Upper Yates to protect our lease from drainage. It is our opinion a slant hole to the standard location 100' to the east would not be feasible.

This notice and all attachments are true and correct to the best of our knowledge and belief.

Yours truly,

  
Lewis B. Burleson
