Re: Downhole Commingling, and measurement of
Hydrocarbon Production for:
TP State #1
Section 35, T16S, R36E
Lea County, New Mexico

Mack Energy Corporation as operator of the aforementioned well respectfully requests administrative approval for down hole commingling and measurement of production.

Mack Energy Corporation proposes to commingle Lovington;Queen, North and Lovington;Grayburg-San Andres production in the TP State #1 well. **Approval to DHC Paddock and GB/SA was given via DHC-3992. At this time a CIBP w/35'cmt cap has been set @ 6120' therefore the amended DHC will only include GB/SA and Queen formations.** Production of all pools will be measured at the TP State TB located in the SE/4 SW/4, Sec. 35 T16S R36E. This lease has common interest in all affected pools. Notification has been made to all parties owning an interest in this lease, including the oil purchaser, of the intent to commingle. Testing will be conducted and allocation percentages will be sent to OCD after completion of this well. The subtraction method will be used to allocate production based on increased production from the added zone.

Should you require any additional information concerning this application, please call Jerry W. Sherrell at the above number. Thank you for your consideration of this request.

Sincerely,

MACK ENERGY CORPORATION
