---	------------------

Describe Cause of Problem and Remedial Action Taken.* On Monday May 19, 2008 at 1445 hrs, a leak was discovered coming from a buried 14" fiberglass line at MCA 2-C Production Header, which is located 1 mile south of the Maljamar Production Office. Amount spilled was 15 bbls of produced water and 16 bbls of crude oil. The spill was not contained an affected approximately 16,500 sq ft of pasture. No fluid was recovered.	CHLORIDE OF QTR ?
---	--------------------------

Describe Area Affected and Cleanup Action Taken.* Upon arrival, the MSO started isolating the line. The source of discharge was a 14" fiberglass collar that separated from the pipe. The area will be remediated in accordance with NMOCD guidelines.
--

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
