Describe Area Affected and Cleanup Action Taken.*

WELL CLEANED UP AROUND WELL REPLACE THANK AND CLEAN UP PIT . WILL HAVE ALL DIRT HALED OFF NEW DIRT PUT BACK IN

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.

RE: C-141 and Remediation Work Plan
Humble State 001 A-17-18S-28E
30-015-01900 Eddy County, New Mexico
2RP-176

Operator;

The New Mexico Oil Conservation Division District 2 office (OCD) is in receipt of a report C-141.

As submitted, the Initial Form C-141 is incomplete and insufficient. The report does not indicate the type of release, source of release, volume released, no signature, etc. As presented, the Form C-141 cannot be approved and is accepted for record only. Please complete a Report C-141 detailing information and re-submit on or before **June 19, 2008**.

NMOCD Rule 19.15.3.116 states in part..."The responsible person must complete **division approved corrective action** for releases which endanger public health or the environment. Releases will be addressed in accordance with a remediation plan submitted to and approved by the division..."

A corrective action proposal (plan) for remediation, removal and/or clean up of contaminants/constituents of concern (TPH, BTEX, and Chlorides) that may be present at the above referenced site shall be provided to OCD. The plan is to be formulated based on vertical and horizontal delineation. The plan is also to be formulated based on site ranking and the OCD Rules and Guidelines.

Soil sampling procedures for laboratory analyses should be conducted according to OCD approved industry standards. Operator is to notify OCD forty-eight (48) hours prior to obtaining samples where analyses are to be submitted to the OCD.

Once the vertical and horizontal extent of contamination has been determined through sampling, operator shall submit a remediation plan that describes the proposed cleanup actions for OCD review and approval. The work plan presented to OCD must include general site characteristics, soil remediation action levels, and the proposed remediation/removal of contaminants. The work plan presented to OCD must include the preliminary, investigative soil analytical report from a certified laboratory. This plan—including the soil analytical report—is to be submitted to the OCD District 2 office on or before **July 9, 2008**.

A publication outlining OCD guidelines and requirements for site ranking and spill remediation can be found on the OCD website as follows: <http://www.emnrd.state.nm.us/oed/EH-MiscGuidelines.htm>

Remediation requirements may be subject to other federal, state, local laws and/or regulations. Additionally, please be advised that OCD approval does not relieve the operator of liability should their operations have

June 9, 2008

failed to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment.

In the event that a satisfactory response is not received to this letter, further enforcement may occur. Such enforcement may include this office applying to the Division for an order summoning you to a hearing before a Division Examiner in Santa Fe. Such a hearing may result in imposition of civil penalties for your violation of OCD rules.

Thank you for your attention to these matters. If I can be of assistance, please contact me at the contact information listed below

Sincerely,

Sherry Bonham
