RE: Waste Manifests for Contaminated Soils Emanating From Upcoming OCD-Funded Activities at the Cockburn State "B" Well Pit and the Millard Deck Estate Pit Reclamation Sites.

Mr. Galemore,

The Oil Conservation Division (OCD) has contracted with INTERA, Inc. to excavate and dispose of contaminated soils from the Cockburn State "B" Well Site Pit (Unit B of Section 1 in Township 18 South, Range 33 East) west of Buckeye, New Mexico and the Millard Deck Estate Pit (Unit D of Section 33 in Township 21 South, Range 35 East) west of Eunice, New Mexico. Those soils are to be transported, respectively, to the Controlled Recovery waste disposal facility near Halfway, New Mexico and to the Sundance facility in Eunice, New Mexico.

INTERA personnel are authorized by the OCD to provide required signature(s) on the associated waste manifests from these projects with the generator to be listed as "Unknown, under authority of the OCD." The specific location of origin of the soils will also be provided on each manifest. This authorization is valid only for soils emanating from these two sites and only between June 10 and June 25, 2008.

If there are any further any questions, please do not hesitate to contact me at (505) 476-3465 or by email at jim.griswold@state.nm.us.

Respectfully,

Jim Griswold
Hydrologist
