RE: Application for Non-Standard Location
for Reams Com 2M to Avoid Distraction
of Pinon and Juniper Woodlands

Dear Mr. Stogner:

This proposed Mesaverde/Dakota well has been staked at a non-standard location of 1360' FSL & 790' FEL, Sec. 19, T-26N, R-6W, Rio Arriba County as shown by the attached C-102. Blanco Mesaverde and Basin Dakota pool rules require a standard location to be located no closer than 130' to the interior quarter-quarter lines. This staked location is only 40' from the east-west quarter-quarter line in the SE/4 of Section 19.

Figure 2 is a topo map showing topographical features in the area. This plat shows that N/2 of the SE/4 of Section 19 is dominated by Dogie Canyon. From a construction, drilling, and operational standpoint, a standard location in Unit I had been identified and proposed at 1460' FSL and 790' FEL. A location further north of this minimum standard location was not feasible because of the presence of Dogie Canyon.

However, construction at this originally proposed site would have required destruction of part of a stand of pinon and juniper trees. The BLM requested that we move the location 100' to the south to preserve them. Honoring this request created the need for a nonstandard location approval. A copy of the letter from the Farmington BLM documenting these circumstances and their request to move the location to 1360' FSL is attached.

Therefore, in the interest of conservation and cooperation with the BLM approval of an NSL order is requested for this alternate nonstandard location. If there are any further questions concerning this application please call me at (915) 686-6548.

Very truly yours,

Jerry W. Hoover

Cococo Inc.
Attn: Mr. W.E. Gray, Jr.
10 Desta Drive, Suite 430E
Midland, TX 79705-4500

Dear Mr. Gray:

On December 17, 1996 an on-site of the proposed Reams Com 2M well, lease No. SF 079296, 1460' FSL & 790' FEL, section 19, T.26N., R.6W. was conducted by Ruben A. Sanchez and Peggy Gaudy of the Farmington District Surface Protection staff, Debra Bemenderfer of Trigon Engineering (agent for Conoco), and Mr. W. E. (Ellis) Gray, Jr., Coordinator Right of Way and Claims for Conoco. The proposed well is located on a bench above the south side of Dogie Canyon. It is primarily in an area of sage vegetation, but extends into a narrow band of pinon and juniper woodlands sloping down to the rim of the canyon.

The proposed Reames Com 2M will have a 14 foot fill at the northeast corner. If the band of trees is left in place it will provide a visual barrier to help reduce visual impacts of the well. The soils in the area are presently stable due to the existing vegetation. To preserve the woodlands we are requesting that Conoco move the well approximately 100 to 120 feet south of the present staked location. This will cause the well to be unorthodox. Located to the south of the proposed Reams Com 2M is the Buttram Federal No. 5, Lease SF 079296, 790' FSL & 855' FEL, sec. 19, T.26N., R.6W., which is in the same lease and is also operated by Conoco Inc.

If you have any questions feel free to contact Ruben Sanchez at our office at (505) 599-8900.

Sincerely,

Myse Auringer
Land Resources
Team Leader
