Mr. Michael Stogner New Mexico Oil Conservation Division 2040 S. Pacheco Santa Fe, New Mexico 87504

RE: Application For Non-Standard location For San Juan 28-7 # 215M to Avoid Drastic Relief in Topography & Archaeological Sites & Riparian Issues

Dear Mr. Stogner,

This proposed Mesaverde/Dakota well has been staked at a non-standard location of 410' FNL & 2250' FWL, Section 4, T27N, R7W, Rio Arriba County as shown by the attached C-102. Blanco Mesaverde and Basin Dakota pool rules require a standard location to be located no closer than 790' from the north section line and 790' from the center section line. This staked location is only 410' from the north section line and 390' from the center section line. Please note that this spacing unit is in the interior of the San Juan 28-7 of which Conoco is the operator. There are no other offset operators that would be affected by this unorthodox Mesaverde/Dakota location.

Figure 2A is a topo map showing the location of Martin Canyon which has been closed to oil field activity by the BLM. Please find attached a letter from the BLM stating why they feel that a non-standard location is necessary and why they suggest this non-standard location be on top of the mesa. Attached is a statement from the Neale C. Edward Survey Company also stating the reasons for our request of a non-standard location.

The proposed well will be completed and tested separately on the Mesaverde and Dakota formations and eventually downhole commingled following adequate testing and approval for commingling.

Mid-Continent Region Exploration/Production Conoco Inc. 10 Desta Drive, Suite 100W Midland, TX 79705-4500 (915) 686-5400

A non-standard location order is requested based on the reasons given in the following attachments. If there are further questions concerning this application please call me at (915) 686-5798.

Sincerely,

Kay Maddox

Regulatory Agent

IN REPLY REFER TO: SF-078496A(07600) 3162.3-1

JAH 27 1994

Conoco Incorporated Attn: Mike Mankin 10 Desta Drive, Suite 430E Midland, TX 79705

Dear Mr. Mankin:

This is in reference to the placement of the proposed San Juan 28-7 Unit number 215M Mesaverde/Dakota well, located 410' FNL, 2250' FWL, Sec. 4, T. 27 N., R. 7 W., lease number SF 078496A. After attempting to find a suitable location within the windows established by the New Mexico Oil Conservation Commission, we suggest you submit for a nonstandard location. A suitable orthodox location was not found because of wildlife and riparian concerns in the canyon bottom and major topographical constraints above the canyon floor. The canyon bottom has been fenced off by the Bureau of Land Management and is being managed for important riparian values and big game calving habitat. A developed spring exists in the canyon bottom which is frequented by big game. Building a location in the bottom of the canyon would have opened up an otherwise pristine area and would have created considerable disturbance to wildlife. A standard location on a bench above the canyon would be inaccessible due to the steep topography. Considerable environmental surface damage would occur with the construction of a pad and access road in such steep terrain. For these reasons a nonstandard location on top of the mesa would be more suitable. There the pad and access road could be built on more level terrain. Construction would require less dirt work, create less resource damage, and would be easier to maintain.

In the past it has been discussed that nonstandard locations would probably be proposed more frequently as the more desirable locations are developed. It is our desire to find the best possible locations for new wells and access roads being proposed, with minimal environmental impacts. Therefore, we will be glad to support your nonstandard proposal for the San Juan 28-7 Unit number 215M well to the NMOCC.

If there is any way we can be of further assistance, please contact Jackie Neckels of the Environmental Compliance Staff at (505) 599-6323.

Sincerely

Senior Technical Advisor

Environmental Compliance

CONOCO, INC. SAN JUAN 28-7 UNIT #215M 410' FNL, 2250' FWL, SEC.4, T27N, R7W, NMPM RIO ARRIBA COUNTY, NM

TO WHOM IT MAY CONCERN @ CONOCO, INC.:

REASONS FOR NON-STANDARD LOCATION:

THE PRIMARY REASON FOR THE NON-STANDARD STAKING OF THE SAN JUAN 28-7 UNIT #215M IS THAT THE PROPOSED LOCATION OCCUPIES AN AREA DECLARED BY THE BUREAU OF LAND MANAGEMENT TO BE CLOSED TO OILFIELD ACTIVITY BECAUSE OF CERTAIN RIPARIAN ISSUES. A SMALL PORTION OF THE QUARTER SECTION, ALTHOUGH NOT WITHIN THE LEGAL WINDOW, IS NOT ACTUALLY IN THE CANYON OF THE RIPARIAN CONCERN; THEREFORE A NON-STANDARD STAKING WITHIN THE QUARTER SECTION WAS AWARDED. FOR THESE REASONS, THE LOCATION STAKED AT 410' FNL 2250' FWL WILL HOPEFULLY BE ACCEPTABLE.
