Oil Conservation Division

Administrative Order PLC-315

August 28, 2008

Chevron U S A, Inc.
15 Smith Road
Room 3337
Midland, TX 79705

Attention: Carolyn Haynie

Chevron U S A, Inc. (OGRID No. 4323) as operator is hereby authorized to surface-commingle oil and gas production from spacing and proration units (pools and wells) shown on the attached Exhibit A, all located within the NW/4 of Section 10, Township 22 South, Range 37 East, Lea County, New Mexico.

The Brunson-Argo Well No. 28 (API No. 30-025-38976) is being commingled into the previously approved PC-1171 surface commingle. This well is the only producer from the Penrose Skelly; Grayburg Oil Pool within this commingle. It is our understanding the Grayburg has separate ownership than the other formations.

Any group of wells producing diversely owned oil or gas shall be separated and measured prior to commingling with oil and gas from other groups of wells within this NW/4 of Section 10 for measurement and sales.

Notice has been provided to all owners within this described surface commingle and no objection has been received.

It is the responsibility of the producer to notify the transporter of this commingling authority. The operator shall notify the Hobbs district office of the Division upon commencement of commingling operations.

MARK E. FESMIRE, P.E.,
Division Director

MEF/wvj

cc: Oil Conservation Division – Hobbs
