Was a Watercourse Reached? ☐ Yes ⊠ No N/A If a Watercourse was Impacted, Describe Fully.\* N/A Describe Cause of Problem and Remedial Action Taken.\* On Sunday January 6, 2008 at 1000 hrs, a leak was discovered coming from a 2" check valve at VGEU #01-01. Amount spilled was 3 bbls of oil and 6 bbls of produced water. The area will be remediated in accordance with NMOCD guidelines. Describe Area Affected and Cleanup Action Taken.\* According to the NMOCD approved plan by Chris Williams on 4/15/08, there was a 2 foot excavation approximately 88' by 70' in the first area and 205' by 5' in the second area. All soils were disposed of at the Sundance Disposal Facility near Eunice, NM then the site was backfilled with clean soil and a final C-141 was issued to the NMOCD. The remediation was started on 8/5/08 and completed on 8/13/08. I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations. **OIL CONSERVATION DIVISION** Signature: Cliff P.
