Attention: Maria L. Perez

Administrative Order NSL-4042(BHL)

Dear Ms. Perez:

Reference is made to your application dated May 19, 1998 for a non-standard subsurface gas producing area/bottomhole gas well location, pursuant to Division General Rule 104.F and 111.C(2) to be applicable to the Undesignated Ross Draw-Wolfcamp Gas Pool for Burlington Resources Oil and Gas Company's ("Burlington") El Paso "14" Federal Well No. 1 to be drilled from a surface location 1900 feet from the South line and 1850 feet from the West line (Unit K) of Section 14, Township 26 South, Range 30 East, NMPM, Eddy County, New Mexico. The S/2 of said Section 14, being a standard 320-acre gas spacing and proration unit for the Undesignated Ross Draw-Wolfcamp Gas Pool, is to be dedicated to said well.

It is our understanding that Burlington intends to kickoff of the vertical portion of said wellbore in a southeasterly direction and drill a lateral horizontal drainhole through the Wolfcamp formation. Further, to allow for natural drift tendencies in normal vertical rotary drilling operations within this immediate area Burlington is requesting a larger than legal drilling window for this producing interval [see Division General Rules 104.B(1)(a) and 111.A(9)].

The applicable drilling window or "producing area" within the Wolfcamp formation for said wellbore shall include that area within the subject 320-acre gas spacing and proration unit comprising the S/2 of said Section 14 that is:

- (a) no closer than 560 feet to the north boundary of the subject 320-acre tract;
- (b) no closer than 660 feet to the South line of said Section 14; and,
- (c) no closer than 1650 feet to the East and West lines of said Section 14.

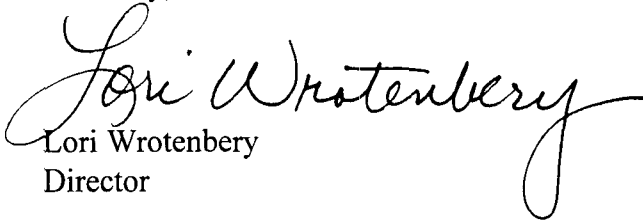

By the authority granted me under the provisions of Division General Rule 104.F(2), the above-described non-standard subsurface gas producing area/bottomhole gas well location for the
