(Investigation Site) Latitude 32.8533056 Longitude -103.3763333

NATURE OF RELEASE

Type of Release UNKNOWN	Volume of Release UNKNOWN	Volume Recovered UNKNOWN
Source of Release UNKNOWN	Date and Hour of Occurrence UNKNOWN	Date and Hour of Discovery APRIL 2007
Was Immediate Notice Given? * see below <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Not Required	If YES, To Whom?	
By Whom?	Date and Hour	
Was a Watercourse Reached? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No	If YES, Volume Impacting the Watercourse. UNKNOWN	
If a Watercourse was Impacted, Describe Fully. *Chloride, Hydrocarbon and total Xylenes impact to groundwater		
Describe Cause of Problem and Remedial Action Taken. * Soil boring conducted in April 2007 at site No. 173608G located within the Unit Boundary of the West Lovington Unit found evidence of ground water impact. The initial investigation indicates chlorides contamination and low level hydrocarbon impact sufficient to warrant further investigation.		
The origin, source, date of occurrence or responsible party for the impact is undetermined.		
*Verbal notification of potential groundwater impact was made to Chris Williams at the local NMOCD District office February 1, 2008. Since the date, time and source of the impacting event is not known, it is assumed that the event was not reported at the time of occurrence.		
Describe Area Affected and Cleanup Action Taken.*		
Ground water impact in remote low activity oil production and ranching location. The nearest known active livestock water supply well is located approximately one mile north of the investigation site. Water gradient flow is believed to be southeast.		
A work plan is being developed to further investigate the potential source of the impact and delineate the area of groundwater impact above standards.		
I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
